A Right Whale, the Bowhead (*Balæna mysticetus*).

whale, a whalebone whale of the family Balænidæ; — so called because regarded by whalers as the right kind to pursue. They are large and have no dorsal fin; the baleen, or whalebone, is very long, the head enormous and about one third the total length, the throat unfurrowed, and the small eye situated near the angle of the mouth. Of the many supposed species described, only two can be positively distinguished, the bowhead, or Greenland, whale (*Balæna mysticetus*), confined to Arctic seas, and the southern right whale (*B. australis*), inhabiting all temperate and tropical seas, but nearly exterminated in the North Atlantic. The former attains a length of 50 to 70 feet, while the latter is slightly smaller with a relatively shorter head. — **r. whale porpoise**, a porpoise of the genus *Tursio*; — so called from having no dorsal fin.

right (rīt), *n.* [AS. *riht*. See RIGHT, *a.*] **1.** That which is right or correct. Specif.: **a** The straight course; adherence to duty; obedience to lawful authority, divine or human; freedom from guilt; specif., *Ethics*, that which is warranted by moral approval; the ideal of moral propriety. By some moralists, *right* is identified with the *good*; by others, it is asserted to be the supreme ethical category to which is attached the sense of duty, or moral imperative. **b** The person, party, or cause that maintains what is right. **2.** That to which one has a just claim; a power or privilege to which one is entitled upon principles of morality, religion, law, or the like. Specif.: **a** A power, privilege, condition of existence, or the like, to have or enjoy which one has a natural claim; as, the *right* of liberty. **b** Any power, privilege, or immunity vested in one by authority, social custom, or the like; esp., any power or privilege vested in a person by the law, whether to act, or to forbear action, or to demand action or forbearance at the hands of another or others; a capacity or privilege the enjoyment of which is secured to a person by law; hence, the interest or share which any one has in a piece of property; title; claim; interest. A legal *right* is the legal consequence of a given set of circumstances. The person having the right is the **person of inherence**, and any person against whom the right runs or upon whom a correlative duty falls is the **person of incidence**. Rights are broadly classed as **substantive rights** (or *primary*, *sanctioned*, or *antecedent rights*), those considered as existing for their own sake and constituting part of the normal legal order of society, as the rights of life, liberty, property, and reputation, and **remedial rights** (or *sanctioning*, *secondary*, or *restitutory*, *rights*), those that arise on a violation of, and for the protection of, substantive rights, as the right of self-defense.

> Born free, he sought his *right*. *Dryden.*

A distinction is very generally drawn by German writers between what they call "Urrechte" and "erworbene Rechte." *Rights* of the former kind, which are also said to be inborn, fundamental, inalienable, natural, immediate, universal, essential, unconditional, or absolute, are such as every human being possesses independently of any act of his own; while *rights* of the latter kind, described as derivative, mediate, alienable, accidental, or hypothetical, are the result of some free act of the person entitled to them. The line between the two classes of *rights* is, however, so variously drawn, and must always be drawn subject to so many qualifications and reservations, that the distinction is of little value. *T. E. Holland.*

3. The side, part, or the like, that is on or toward the right side (see RIGHT, *a.*, 10); as: **a** The side opposite to the left side; also, the right-hand portion or division; as, the *right* of an army. "Led her to the Souldan's *right*." *Spenser.* **b** *Politics.* In some legislative bodies of Europe (as in France), those members collectively who are conservatives or monarchists. See CENTER, *n.*, 9. [As used of a particular group usually *cap.*] **c** The outward or most finished surface, as of a piece of cloth, a carpet, etc. **d** Of things in pairs, as gloves, shoes, etc., one for use on the right side. **4.** One of the principal tines of a stag's antler, a brow tine, bez-tine, or tres-tine, collectively known as the *rights*. **5.** A fee; a due. *Obs.*

at all rights, at all points; in all respects. *Obs. Chaucer.* — **by right, by rights**, *or* **by good rights**, rightly; properly.

> I should have been a woman *by right*. *Shak.*

— **by r. of**, by reason of; because of; by virtue of; as, Spain claimed the island *by right of* conquest; primacy *by right of* merit. — **in one's own r.**, by title vested in one's self; not through the ownership or title of another; as, she has a fortune *in her own right*. — **in the r.**, right; correct; also, rarely, upright; as, in the discussion he professor was *in the right*. — **of r.**, legally or morally demandable or exactable; as, bail in misdemeanors is *of right*; also, as an absolute right, not depending upon discretion; as, to demand a jury trial *of right*. — **r. in rem**. See IN REM **a**. — **r. of action**. *Law.* **a** A right to begin and prosecute an action in the courts. **b** A chose in action. *Rare.* — **r. of continuity**, *International Law*, the right, sometimes claimed by a nation occupying such a part of a region with artificial or natural boundaries as enables it to control the whole region, to claim constructive occupation of the whole region. — **r. of drip**, *Law*, an easement or servitude giving a man the right to have the water flowing from his house fall on the land of his neighbor. It does not exist except as acquired by grant or prescription. — **r. of search**, *Mar. Law*, the right of a belligerent to stop any merchant vessel of a neutral state on the high seas and make such examination and search as may be reasonably necessary to determine whether she has become liable to capture by violation of the laws of war, as by carrying contraband goods; — usually called in British works **r. of visit**, *or*, more properly, **r. of visit** (*or* **visitation**) **and search**. In British theory neutral merchant vessels convoyed by neutral warships are subject to search; in the theory of most Continental states and of the United States they are not, and these latter states have often conceded the right by treaty. A similar right arises in time of peace under some circumstances, as for the purpose of enforcing revenue law, preventing piracy, etc. Great Britain, in negotiating with the United States just before the middle of the 19th century, endeavored to maintain between search and visitation the distinction that visitation was merely to ascertain whether a merchant vessel was entitled to the protection of the flag she carried, and that the right to make it existed in time of peace. — **r. of support**. *Law.* **a** An easement or servitude by which the owner of a house has a right to rest his timber on the walls of his neighbor's house. **b** The right to have one's land supported by the land lying adjacent (**lateral support**) or by the earth beneath, as where mines are dug (**subjacent support**). — **r. of visit** (*or* **visitation**) *or, more properly*, **r. of visit** (*or* **visitation**) **and search**. = RIGHT OF SEARCH. — **r. of way**. *Law.* A right of passage over another person's ground. See EASEMENT, 3, SERVITUDE. **b** [*pl.* RIGHT OF WAYS.] A narrow street; a lane. *Australia.* This use originated in Melbourne. In laying out the city, narrow passages subject to a *right of way* were left through the lots from one broad street to another. Hence, the term came to be applied to the passages. — **rights of man**, a group of fundamental rights embodied in a famous declaration adopted by the French National Assembly in August, 1789, and, in a modified form, appearing in subsequent French constitutions down to 1848. — **to have a** (good) **right**. **a** To be under an obligation; as, you *have a right* to behave better. **b** To have a reason, excuse, probable cause, or the like; as, I *had a right* to have struck him down; I *had a right* to get hurt considering the risks. *All Dial. or Colloq.* — **to right**. **a** In a direct line; straight. *Obs.* **b** At once; directly. *Obs. or Dial.* **c** In order; as, to set matters *to rights*. *Colloq.*

Roman alphabet. See LATIN, *n.*, 1. — **R. alum**, ordinary alum crystallized in cubes; esp., that made from Italian alunite, opaque and colored reddish by iron oxide. — **R. arch**, the semicircular arch. — **R. balance**, a form of balance resembling the modern steelyard. — **R. calendar**, the calendar of the ancient Romans, from which our modern calendars are derived. It is said to have consisted originally of ten months, *Martius*, *Aprilis*, *Maius*, *Junius*, *Quintilis*, *Sextilis*, September, October, November, and December, having a total of 304 days. Numa added two months, *Januarius* at the beginning of the year, and *Februarius* at the end, making in all 355 days. He also ordered an intercalary month, *Mercedinus*, to be inserted every second year. Later the order of the months was changed so that January should come before February. Through abuse of power by the pontiffs to whose care it was committed, this calendar fell into confusion. It was replaced by the Julian calendar. See 1st CALENDAR, 1. In designating the days of the month, the Romans reckoned backward from three fixed points, the *calends*, the *nones*, and the *ides*. The calends were the first day of the month. The ides fell on the 15th in March, May, July (Quintilus), and October, and on the 13th in other months. The nones came on the eighth day (the *ninth*, counting the ides) before the ides. Thus, Jan. 13 was called the ides of January, Jan. 12, the day before the ides, and Jan. 11, the *third* day before the ides (since the ides count as one), while Jan. 14 was the 19th day before the calends of February. — **R. candle**, a kind of firework (generally held in the hand) characterized by the continued emission of a shower of sparks, and the ejection, at intervals, of balls or stars of fire. — **R. canvas**, a canvas, used by artists for oil painting, made of linen and coated on one side with paint. — **R. Catholic**, of, pertaining to, or designating, the Church of Rome. Also, a member of the Roman Catholic Church. — **R. Catholic canon.** See 1st CANON, 4. — **R. Catholic Church**, the Church of Rome, or that body of Christians of which the Pope, or bishop of Rome, is the head. Its first head was St. Peter, that the popes are his successors, and that hence, basing the claim upon an interpretation of Matt. xvi. 18, this church is the one holy, catholic, and apostolic church. It is governed by a hierarchy consisting of the Pope, archbishops, bishops, and priests, the archbishops and bishops being elected, subject to approval by the Pope, and the priests being ordained by a bishop or archbishop. Celibacy of the clergy is a rule of the church. The doctrines of the church are those contained in the decrees of the Council of Trent (1545–63) with the later ones of the immaculate conception and of papal infallibility. Papal supremacy and infallibility and the immaculate conception are the most distinctive doctrines, while in addition to these those of the seven sacraments, purgatory, the invocation of saints, the veneration of images, the Mass as a true propitiatory sacrifice, transubstantiation, and indulgences, also distinguish the church from most other Western Christians. The worship of the church is an elaborate ritual, centering about the sacrifice of the Mass. — **R. Catholicism**, the faith, practice, polity, etc., of the Roman Catholic Church. — **R. cement**, a kind of hydraulic lime prepared by calcining septaria and grinding dry to a fine powder. It is frequently used pure where rapid setting is of importance. — **R. collar.** *Eccl.* **a** *R. C. Ch.* A turnover collar of lawn or linen worn by ecclesiastics. That worn by a bishop is white with a purple stock; that worn by a cardinal is white with a scarlet stock. **b** A straight collar, the ends of which meet at the back, worn by clergymen. — **R. Dutch. a** Designating, or pertaining to, the Civil-law system in use among the Dutch. — **Roman Empire**, the empire of ancient Rome, which first came under imperial rule when Augustus Cæsar became absolute, B. C. 29. Under Diocletian, who became emperor 284 A. D., the empire was divided into East and West, but it was only after the death of Theodosius the Great, 395 A. D., that the *Western Roman Empire* and the *Eastern Roman Empire* (called also *Byzantine*, *Greek*, or *Romæan Empire*) were finally separated. The Western Empire came to an end in 476 A. D.; the Eastern Empire endured until the fall of Constantinople in 1453. In the year 800 Charlemagne was crowned Roman emperor, at Rome, and inaugurated anew the Western Empire as the *Holy Roman Empire*. This empire, after the severance of the Frankish kingdom, had its main seat in German Austria, and was continued in name by a succession of German emperors until, in 1806, Francis II. of Austria-Hungary resigned the title of Roman emperor. — **R. Era**, the Era of Varro. See ERA, *Table.* — **R. fever**, *Med.*, a severe form of malarial fever occurring in the neighborhood of Rome. — **R. finish**, a kind of yellow mat finish on gold. — **R. foot.** = PES (see MEASURE, *Table*). — **R. gold**, gold having a Roman finish. — **R. hyacinth**, a hyacinth (*Hyacinthus albulus*) with loosely flowered spikes, of which several grow from one bulb. — **R., *or* Pontifical, Indiction**, the indiction beginning A. D. 313, January 1st, the numbers of which cycle were adopted by Scaliger in constructing the Julian period. — **R. laurel**, the true laurel. — **R. law**, the legal system of the ancient Romans, including the customary or unwritten law and the written law. The Roman law was originally largely religious or sacral in character, but this later became of secondary importance. The Roman law consisted mainly of the city law of Rome, the laws emanated by the various assemblies and by the emperors, the edicts or prætorian law, and the codes (see CODE, *n.*, 1) of the later emperors. See LEX, 1; JUS; NATURAL LAW **b**; JUS GENTIUM; EDICT; CIVIL LAW. — **R. Liturgy.** See LITURGY, 1, V. — **R. lock**, a simple lock in which the bolt is kept in any position by a binder spring. — **R. mile.** See MILE. — **R. nose**, a nose somewhat aquiline. — **R. numeral**, a numeral in the Roman system of notation, of which the following are the symbols chiefly used: I = 1; V = 5; X = 10; L = 50; C = 100; D = 500; M = 1,000. Intermediate and higher numbers are expressed by combining these symbols according to the following rules: (1) Any symbol following one of equal or greater value adds its value. Thus II = 2; VI = 6. (2) Any symbol preceding one of greater value subtracts its value. Thus IV = 4; XL = 40. (3) When a symbol stands between two of greater value its value is subtracted from the second and the remainder is added to the first. Thus XIV = 14; LIX = 59. (4) Of two equivalent ways of representing a number that in which the symbol of larger denomination precedes is preferred; thus XIV, not VIX, for 14; XLV, not VL, for 45; — except that a shorter form by subtraction is (in modern usage) preferred to a very long form by addition. Thus IX rather than VIIII for 9; MCM rather than MDCCCC for 1900. Thousands are sometimes indicated by drawing a line over a numeral; as, V̄ = 5,000. In origin, the symbol V was perhaps simply the half of X; L succeeded a symbol ⊥, derived from the Chalcidian ⋔; M, possibly as the initial letter of *mille*, thousand, was a late substitution for ↀ, a modification of Ⅾ, the Chalcidian form of Φ; and D is the half of Ⅾ. — **R. ocher**, a brownish yellow variety of ocher. — **R. order.** *Arch.* **a** The Composite order. See COMPOSITE, *a.*, 2. **b** The characteristic use of columns and entablatures where the actual structure is arcuated, as in the Colosseum. — **R. pace.** See 1st PACE, 2. — **R. peace**, the peace imposed by Roman dominion. See PEACE, *n.*, 1. — **R. pearl**, a kind of imitation pearl whose luster is derived from a liquid preparation of fish scales applied upon wax. — **R. punch**, a water ice made with lemon juice, sugar, beaten whites of eggs, and rum. — **R. squill**, the Roman hyacinth. — **R. string**, a kind of fine catgut string, for instruments of the violin class, made in Italy. — **R. table**, a table of Roman numerals with equivalent Arabic numerals in parallel columns. — **R. V**, the Hyades; — a familiar name, from the shape of the asterism. — **R. vitriol.** = BLUE VITRIOL. — **R. white**, a variety of white lead. — **R. wormwood. a** The common ragweed. *U. S.* **b** A European wormwood (*Artemisia pontica*), one of the sources of absinthe.

ro-man'ti-cism (-tĭ-sĭz'm), *n.* [Cf. F. *romanticisme.*] Romantic principles or characteristics generally; conformity to, or practice of, the romantic style. As a critical term *romanticism* generally denotes the principles, characteristics, or spirit of the movement, primarily in literature, for reasserting imagination and sentiment as against the restrictive formality of classicism (which see). By about 1798 this movement had become a conscious reaction from classical to medieval models in Germany, England, and France, *romanticism* signifying more especially the spirit of chivalry, adventure, and wonder, the preoccupation with picturesque and suggestive aspects of nature, and with the passionate in life. The term is also applied to the school of musical composers in which similar qualities are paramount, their work showing more concern for passionate expressiveness than for adherence to formal canons. In literary discussion it is often opposed to *realism*, taken as chiefly concerned with literal fact. Cf. GOTHICISM, 2.
He [Lessing] may be said to have begun the revolt from pseudo-classicism in poetry, and to have been thus unconsciously the founder of *romanticism.* *Colvill.*

roost'er (rōōs'tẽr). *n.* **a** The male of the domestic fowl; a cock. *U. S.* **b** A bird that roosts.

root (rōōt), *v. i.* [AS. *wrōtan*; akin to *wrōt* a snout, trunk, D. *wroeten* to root, G. *rüssel* snout, trunk, proboscis, Icel. *rōta* to root, and perh. to L. *rodere* to gnaw (E. *rodent*).] **1.** To turn up the earth with the snout, as swine; formerly, to push with the snout.

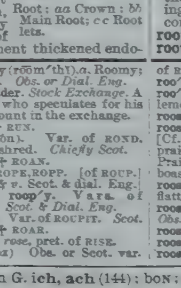
2. Hence, to seek for favor or advancement by low arts or groveling servility; to fawn servilely. *Rare.*

root, *v. t.* **1.** To turn up, or to dig out, with the snout; as, the swine *roots* the earth.

2. With *up* or *out*, to dig with the snout; as, the swine *roots* up truffles.

root, *v. i.* [Cf. ROUT to roar.] To shout for, or otherwise noisily applaud or encourage, a contestant, as in sports; hence, to wish earnestly for the success of some one or the happening of some event, with the superstitious notion that this action may have efficacy; — usually with *for*; as, the crowd *rooted* for the home team. *Slang or Cant, U. S.*

root, *n.* [ME. *rote, roote*, AS. *rōt*, prob. of Scand. origin; cf. Icel. *rōt* (for *vrōt*), Sw. *rot*, Dan. *rod*; akin to E. *wort*. See WORT.] **1.** *Bot.* In the higher plants (ferns and seed plants), a portion of the plant body bearing neither leaves nor reproductive organs, but provided with an apical growing point and functioning as an organ of absorption, an aërating organ, a food reservoir, or a means of mechanical support. In most plants the root originates as the lower extremity of the hypocotyl. Perennial roots exhibit the same tissue systems as the stem, the stele being continuous. They differ in the mode of development of the procambium strands, the prominent thickened endodermis, and the presence of a protective cap (*rootcap* or *calyptra*) over the meristem of the growing point. The mode of branching is normally acropetal; but *adventitious* roots may arise on other portions of the plant body (see ADVENTITIOUS ROOTS). The roots of epiphytes are wholly aërial (see AËRIAL ROOTS). In the lower plants most functions of roots are performed by rhizoids. Cf. STEM, ROOT HAIR.



Root: *aa* Crown; *bb* Main Root; *cc* Root lets.

2. Popularly, any subterranean part of a plant, whether consisting of a true root or of a bulb, tuber, rootstock, or other modified stem; specif., any large fleshy edible root or rootlike organ, as a carrot, turnip, radish, potato, etc.

The "mangel" of the farm, which is generally termed a "*root*," consists of thickened hypocotyl and true *root*. *Percival.*

3. That which resembles a root in position or function, esp. as a source of nourishment or support; that from which anything proceeds as if by growth or development; as, the *root* of a nail, a cancer, and the like. Specif.: **a** An ancestor or progenitor; and hence, an early race; a stem.

The *roots* out of which sprang two distinct people. *Locke.*

b The part of an organ by which it is attached, as that part of a tooth in the socket or alveolus; also, any of the fangs into which this sometimes divides. **c** *Philol.* One of the earliest, or ideal, forms of words, in a group of languages, that can be inferred from data to have existed before the addition of suffixes and prefixes and of inflectional endings; a primitive word form; a radix or radical. **d** The cause or occasion by which anything is brought about; the source.

The love of money is a *root* of all kinds of evil.
1 Tim. vi. 10 (*Rev. Ver.*).

e A foundation; basis; ground. *Rare.* "The *root* of his opinion." *Shak.* **f** *Music.* The fundamental tone of any compound tone, series of harmonics, or chord; the tone from whose harmonics, or overtones, a chord is composed; often simply the lowest tone of a chord in its normal position. **g** The lowest place, position, or part; the bottom; hence, fig., the fundamental or essential point or part; as, let us get to the *root* of the matter. "Deep to the *roots* of hell." *Milton.* **h** *Math.* A quantity which, taken as a factor a number of times (indicated by the index), produces another quantity; thus, either +3 or −3 is a second *root* of 9, because either taken twice as a factor produces 9; also 4, −4, $4i$, $-4i$ are all fourth *roots* of 256, which is the fourth *power* of each. Power and root are correlative: an *n*th root of *q* is that whose *n*th power is *q*. There are *n* real or imaginary *n*th roots of any *q*, but only one *n*th power of any *q*. **i** *Mach.* That part of a tooth between the pitch line and a line touching the bottoms of the spaces on each side. **j** The part of a weir or dam next to the bank.

4. *Astrol. & Chron.* The time from which to reckon in making calculations; the state of the heavens at the time of birth; the initial time, or epoch, as of a movable feast.

What *root* is of a birth yless (known). *Chaucer.*

5. *Math.* Any value that, substituted for the unknown quantity in an equation, or in a congruence, satisfies the equation, etc. An equation of *n*th degree has *n* such roots.

6. *Mohamm. Law.* The first class of residuaries, consisting of the direct lineal male ancestors.

root and branch, every part; hence, wholly; completely; as, to destroy an error *root and branch*. — **r.-and-branch men,** radical reformers; — applied *[usually cap.]* to the English Independents (1641). See RADICAL, *n.*, 4. — **r. of scarcity,** the mangel-wurzel.

root (rōōt), *v. i.*; ROOT'ED; ROOT'ING. **1.** To fix the root; to enter the earth, as roots; to take root and begin to grow.

2. To be or become firmly fixed or established.

If any irregularity chanced to . . . cause misapprehensions, he gave them not leave to *root* and fasten by concealment. *Bp. Fell.*

root, *v. t.* **1.** To plant and fix deeply in or as in the earth; to implant firmly; hence, to make deep or radical; to establish; — used chiefly in *p. p.*; as, *rooted* trees; *rooted* dislike.

2. To tear up by the root; to eradicate; to remove entirely; — with *up*, *out*, or *away*.

The Lord *rooted* them out of their land. *Deut.* xxix 28.

root beer. A kind of nonalcoholic beer made with the extracts from various roots. See BEER, *n.*, 2.

2. A roll or list, as of schoolboys, soldiers, or the like.

ro'ta, *n.* [LL. See ROTE, the instrument.] *Music.* **a** An instrument like the lyre, played by plucking with the fingers or with a plectrum. Cf. 1st ROTE. **b** A round, such as the famous "Sumer is icumen in."

Ro'ta, *n.* [LL. ; cf. L. *rota* wheel ; — said to allude to the wheel-like design of the floor of the room in which the court used to sit. See ROTARY.] **1.** *R. C. Ch.* An ecclesiastical court, called also **Rota Romana**, that hears appeals. It consists of twelve auditors and is presided over by a dean. **2.** *Eng. Hist.* A short-lived political club formed in 1659 by J. Harrington to further his plan for rotation of magistrates and legislators, as embodied in his "Oceana" (1656).

Ro-ta'li-a (rō-tā'lĭ-ä), *n.* [NL., fr. L. *rota* wheel.] *Zoöl.* A genus of Foraminifera having a finely perforated test with the segments in a turbinoid spiral and with septa composed of two lamellæ between which are anastomosing canals. — **ro-ta'li-an** (-tā'lĭ-ăn), *a. & n.* — **ro-tal'i-form** (rō-tăl'ĭ-fôrm), **ro-ta'li-i-form'** (rō-tā'lĭ-ĭ-fôrm'), *a.*

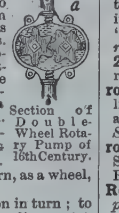
ro-tam'e-ter (rō-tăm'ē-tẽr), *n.* [L. *rota* wheel + *-meter.*] An instrument for measuring curved lines by running over them a small wheel connected with a recording dial. Cf. ODISOMETER, PERAMBULATOR, 2, etc.

Rotameter.

ro'ta-ry (rō'tä-rĭ), *a.* [L. *rota* a wheel. See ROLL, *v.* ; cf. BAROUCHE, RODOMONTADE, ROUÉ.] **1.** Turning, as a wheel on its axis ; pert. to, or resembling, the motion of a wheel on its axis ; having parts that rotate ; rotatory ; as, *rotary* motion.

2. Pertaining to rotation in office ; holding office or held, as an office, in rotation. *R.*

rotary battery, a stamp battery with the stamps arranged in circular form. — **r. converter.** See SYNCHRONOUS CONVERTER. — **r. current**, *Elec.*, a multiphase current. — **r. discard**, *Whist*, a discard of a certain suit made, by an arbitrary convention, to denote strength in a certain other suit. — **r. engine.** See STEAM ENGINE. — **r. field motor**, *Elec.*, an induction motor. — **r. planer**, *Mach.*, a planing machine in which a rotary movement is given to the tool or cutters. — **r. press**, *Print.*, a cylinder press with the type form curved to fit a rotating cylinder. — **r. pump**, a pump in which the fluid is impelled by rotating devices instead of reciprocating buckets or pistons. — **r. shears**, shears in which revolving sharp-edged or sharp-cornered wheels do the cutting. See SHEARS, 1 **d**, *Illust.* — **r. squeezer.** See SQUEEZER, *n.*, 1 **c**. — **r. transformer.** = ROTARY CONVERTER. See also TRANSFORMER. — **r. valve**, a valve acting by continuous or partial rotation.



Section of Double Wheel Rotary Pump of 16th Century.

ro'tate (rō'tāt *or, esp. in British usage,* rō-tāt'), *v. i.* ; RO'TAT-ED (-tāt-ĕd) ; RO'TAT-ING (-tāt-ĭng). [L. *rotatus*, p. p. of *rotare*, fr. *rota* wheel. See ROTARY ; cf. ROUÉ.] **1.** To turn, as a wheel, round an axis ; to revolve.

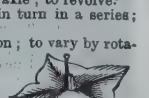
2. To perform any act, function, or operation in turn ; to pass or alternate in a series ; as, members of a clique *rotating* in office and the office *rotating* among them.

Syn. — See REVOLVE.

ro'tate, *v. t.* **1.** To cause to rotate, or turn, as a wheel, around an axle ; to revolve.

2. To cause to succeed, pass, or act, in turn in a series ; as, to *rotate* men in office.

3. *Agric.* To cause to grow in rotation ; to vary by rotational planting ; as, to *rotate* crops.



Rotate Corolla of *Senanthemum.*

ro'tate (-tāt), *a.* [L. *rotatus*, p. p. See ROTATE, *v.*] Having the parts flat and spreading or radiating like those of a wheel ; wheel-shaped.

ro'tat-ing (rō'tāt-ĭng), *p. pr. & vb. n.* of ROTATE. — **rotating band.** = ROTATING RING. — **r. current**, *Elec.*, a current producing a rotating magnetic field ; a multiphase current. — **r. ring**, *Ordnance*, the ring of metal around a projectile, to take the grooves of the rifling and thus impart rotation.

ro-ta'tion (rō-tā'shŭn), *n.* [L. *rotatio* : cf. F. *rotation.*] **1.** Act of rotating, or turning on an axis. See REVOLUTION, 1 **b**.

2. Any return or succession in a series ; as, the *rotation* of the seasons ; *rotation* in office.

3. In technical uses : **a** *Anat. & Physiol.* The turning of a limb or part about its long axis as if on a pivot, as when the head is turned in looking over the shoulder. **b** *Plant Physiol.* The streaming movement of the cytoplasm around the wall of a cell. Cf. CIRCULATION, 5. **c** *Forestry.* The total cycle or period during which a given stand of timber occupies a piece of ground.

rotation of crops, *Agric.*, the cultivation of a succession of different crops on the same piece of land before it is again planted with the original crop, to promote the fertility of the soil by varying the demands upon it. Ordinarily corn or a root crop, as turnips or swedes, is followed by a grain, as wheat, oats, or barley, and this by a leguminous crop, as clover or peas. — **r. of mutes**, *Philol.*, Lautverschiebung.

ro-ta'tion-al (-ăl), *a.* Pertaining to, or resulting from, rotation ; of the nature of, or characterized by, rotation.

ro'ta-tive (rō'tä-tĭv), *a.* [Cf. F. *rotatif.*] **1.** Turning, as a wheel ; rotary ; rotational ; as, *rotative* velocity.

2. Causing rotation.

rotative engine, a steam engine in which the reciprocating motion of the piston is transformed into a continuous rotary motion.

ro-ta'tor (rō-tā'tŏr), *n.* [L.] One that rotates ; specif. : **a** *Anat.* [*pl.* ROTATORES (rō'tä-tō'rēz ; spĭ'nē)] A muscle which partially rotates a part on its axis. **b** *Metal.* A revolving reverberatory furnace. **c** *Math.* The quantity ($\cos\theta + i \sin\theta$) which rotates a vector through the angle θ without changing its magnitude. **d** The screwlike part of a ship's log that causes the log to rotate in the water. **e** A small fast-running electric motor specially adapted for rotating Geissler tubes, color disks, siren disks, etc.

ro'ta-to'res spĭ'næ (rō'tä-tō'rēz spĭ'nē) [NL.], *Anat.*, any of certain small muscles in the dorsal region of the spine, each arising from the upper and back part of a transverse process and inserted into the lamina of the vertebra above.

ro'ta-to-ry (rō'tä-tō-rĭ), *a.* [See ROTATE, ROTARY.] **1.** Of, pert. to, or producing, rotation ; turning on or as on an axis ; having parts that rotate ; rotary ; as, *rotatory* power ; *rotatory* motion ; a *rotatory* engine.

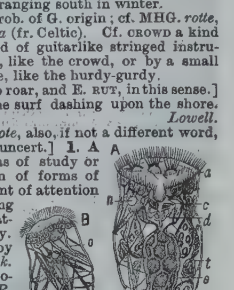
2. Going in a circle or series ; following in rotation or succession ; as, *rotatory* assemblies. *Burke.*

rotche, rotch (rŏch), *n.* A very small, short-billed auk (*Alle alle*) breeding on the coasts of the Arctic Ocean and northern North Atlantic, ranging south in winter.

rote (rōt), *n.* [OF. *rote*, prob. of G. origin ; cf. MHG. *rotte*, OHG. *rotta*, also LL. *crotta* (fr. Celtic). Cf. CROWD a kind of violin.] *Music.* A kind of guitarlike stringed instrument, played with a bow, like the crowd, or by a small wheel or wheel-like device, like the hurdy-gurdy.

rote, *n.* [Cf. Icel. *raута* to roar, and E. RUT, in this sense.] The noise produced by the surf dashing upon the shore. Cf. RUT, roaring. *Lowell.*

rote, *n.* [ME. *rote* in *by rote*, also, if not a different word, condition, custom ; orig. uncert.] **1.** A fixed course or routine, as of study or speech ; hence, repetition of forms of speech, often implying want of attention to the meaning ; memorizing through repetition or repeating solely from memory. "Rehearse your song by *rote*." *Shak.*



A Rotifer (*Hydatina senta*). *A* Female ; *B* Male. *a* Circle of Cilia ; *b* Caudal Appendages ; *c* Mouth ; *d* Mastax ; *e* Stomach ; *l* Ovary ; *n* Ganglion ; *p* Penis ; *r* Spermary ; *t* Nephridium ; *v* Bladder. Much enlarged.

2. That learned by memorizing ; a memorized rôle. *R.*

rot'gut' (rŏt'gŭt'), *n.* Bad liquor, esp. when adulterated so as to be deleterious. *Slang.*

rot'i-fer (rŏt'ĭ-fẽr), *n.* [NL. See ROTIFERA.] One of the Rotifera.

Ro-tif'er-a (rō-tĭf'ẽr-ä), *n. pl.* [NL., L. *rota* a wheel + *ferre* to bear.] *Zoöl.* A class of minute, usually microscopic, but many-celled

ro'tate (rō'tāt ; *cf. v. i., preceding*), *v. t.* **1.** To cause to rotate, or turn, as a wheel, around an axle ; to revolve.

2. To cause to succeed, pass, or act, in turn in a series ; as, to *rotate* men in office.

aquatic animals having the anterior end modified into a retractile disk bearing one or two circles of strong cilia, which, when in motion, often give the appearance of rapidly revolving wheels. The posterior end usually forms a tapering tail or foot, by which many forms can attach themselves. The pharynx contains a chitinous masticating apparatus (see MASTAX). In modern classifications, the Rotifera are the chief class of a phylum, Trochelminthes. They are most abundant in stagnant fresh water. — **ro-tif'er-al** (rō-tĭf'ĕr-ăl), *a.* — **ro-tif'er-ous** (-ŭs), *a.*

ro'ti-form (rō'tĭ-fôrm), *a.* [L. *rota* wheel + *-form.*] Wheel-shaped; rotate.

rot'l (rŏt'l), *n.* [Ar. *raṭl, riṭl.*] A weight of Turkey, North Africa, Persia, etc., corresponding to the pound, but varying greatly with the locality; also, a varying dry measure. The Egyptian customs rotl equals 0.9905 pound av. (0.449 kg.); in Morocco the rotl is equal to about 1.68 lbs. (0.76 kg.); Tunis, 1.11 lbs. (0.50 kg.); at Mocha, 1.125 lbs. (0.51 kg.); Malta, 1.75 lbs. (0.79 kg.).

ro'tor (rō'tôr), *n.* [Short for *rotator.*] **1.** *Math.* A localized vector, or one that cannot be moved about anywhere, always parallel to itself without changing its value, but can be only slid back and forth along a line called its *axis.* It represents by its length and sense the velocity and sense of a rotation about its axis. *Clifford*

2. *Mach.* A part that revolves in a stationary part, esp. when both are large; specif.: **a** *Elec.* The rotating member of an electrical machine. **b** The rotating wheel or group of wheels in a steam turbine. Cf. STATOR.

rot'ten (rŏt'n), *a.* [ME. *roten*, of Scand. orig.; cf. Icel. *rotinn*; akin to Sw. *rutten*, Dan. *raadden*. See ROT.] **1.** Having rotted; putrid; decayed; hence, offensive to the smell; fetid. "Reek of the *rotten* fens." *Shak.*

2. Affected with rot, as an animal. See ROT, *n.*, 3.

3. Unsound, as if rotted; not firm or trusty; disintegrated or defective in solidity; as, *rotten* iron. "The *rotten* way." *Knolles*

4. Fig.: Unsound or corrupt; esp., morally corrupt or lacking in integrity; as, *rotten* municipal government.

Something is *rotten* in the state of Denmark. *Shak.*

5. Disgustingly bad or inferior; abominable. *Slang.*

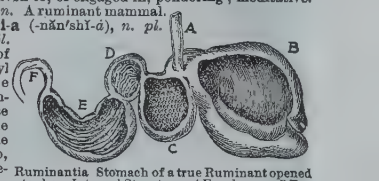
ru'mi-nant, *n.* A ruminant mammal.

Ru'mi-nan'ti-a (-năn'shĭ-ă), *n. pl.* [NL.] *Zoöl.* A division of artiodactyl ungulate mammals including those that chew the cud, as the oxen, sheep, goats, antelopes, giraffes, deer, chevrotains, and camels. They are divided into three principal groups: the Pecora (which see), or true ruminants, in which the complex stomach is completely four-chambered; the Tylopoda, or camels and llamas, in which it is imperfectly four-parted; and the Tragulina, or chevrotains, in which it is three-parted. The first and largest division of the stomach of typical ruminants is the rumen, or paunch; the second, the reticulum; the third, the omasum, psalterium, or manyplies; and the fourth, the abomasum, or rennet bag. The herbaceous food is swallowed unchewed, and passes into the rumen or the reticulum, whence it is regurgitated in masses which are then thoroughly masticated and mixed with saliva while the animal is at rest. It is then swallowed, mixed with saliva to a semifluid mass, and passes through the reticulum and omasum into the abomasum, where it is acted on by the gastric juice.



Ruminantia. Stomach of a true Ruminant opened to show Internal Structure. *A* Esophagus; *B* Rumen; *C* Reticulum; *D* Omasum, Psalterium, or Manyplies; *E* Abomasum; *F* Intestine.

Russia, and including the Ruthenians and the Cossacks; and the White Russians, a relatively small group in West Russia, adjoining the Poles and Lithuanians. (2) Those speaking the Ural-Altaic languages, chiefly Finno-Ugric tongues (see Finno-Ugric), together with such Turkic idioms as Chuvash, Kirghiz, Kazan Tatar, etc., of southeastern Russia. (3) The linguistic families of Caucasia (see Caucasian, *n.*, 1).

Ethnically, according to Ripley, Russia is peopled by an aboriginal, tall, red-blond, dolichocephalic race, probably of Finnish speech, intermixed, in the Russians proper, with Slavic-speaking conquerors of the brachycephalic Alpine race; while in the extreme north, southeast, and east, Mongolian races have settled and modified the type in varying degrees. Deniker finds in central and northern Russia and Finland representatives of his Northern, Sub-Northern, and Eastern European races; in eastern and southern Russia, traces of the Cevenole race; in Poland, of the Vistulian; and in the southern provinces, of the Adriatic and Sub-Adriatic as well. Linguistic and race boundaries have only a general correspondence.

2. The chief Slavic language of Russia. It is divided into **Great Russian**, which furnishes the standard literary language, **Little Russian**, spoken in parts of Austria-Hungary as well as southern Russia, and **White Russian**, the speech of four or five million people of western Russia. Russian records are as old as the 10th or 11th century, but the literature dates chiefly since the time of Peter the Great, in whose reign the old form of the Russian alphabet, which differed little from the Cyrillic, was reduced from 48 to 35 letters. See Indo-European.

sab'u-lous (săb'ū-lŭs), *a.* [L. *sabulosus.*] Sandy; gritty.

sac (săk), *n.* [F., fr. L. *saccus* a sack. See SACK a bag.] *Bot., Anat., & Zoöl.* A baglike part of an animal or plant; a soft-walled cavity or pouch, usually having only a narrow opening or none at all, and in many cases containing some special fluid; as, a synovial *sac*; lachrymal *sac.*

Sac (săk; sŏk), *or* **Sauk** (sôk), *n.* One of a tribe of Algonquian Indians formerly dwelling along the Mississippi in Illinois and neighboring States, now in Oklahoma, Iowa, and Kansas. They were confederated with the Foxes in 1760. In 1832, under Black Hawk, they resisted execution of the treaty relinquishing their lands east of the Mississippi.

sac-cade' (sȧ-kād'), *n.* [F.] **1.** *Man.* A quick, violent check of a horse by a single pull or twitch of the reins. **2.** *Music.* A firm pressure of the violin bow against the strings, so that two or three can be sounded at one stroke.

Sac-cam'mi-na (sȧ-kăm'ĭ-nȧ), *n.* [NL.] *Zoöl.* A genus of Foraminifera having a thick, arenaceous, spherical, pear-shaped, or fusiform test, remarkable for having survived from the Ordovician to the present time. Certain Carboniferous strata consist chiefly of their remains.

sac'cate (săk'āt), *a.* [NL. *saccatus*, fr. L. *saccus* a sack, bag.] **1.** *Biol.* Having the form of a sac or pouch. **2.** Of or pert. to the **Sac-ca'ta** (sȧ-kā'tȧ), a suborder of ctenophores having two pouches into which the tentacles can be retracted.

sac'ca-ton' (săk'ȧ-tŏn'), *n.* A coarse perennial grass (*Sporobolus wrightii*) of the southwestern United States, useful for hay in alkaline regions.

sac'cha-rate (săk'ȧ-rāt), *n.* *Chem.* **a** A salt or ester of saccharic acid. **b** A compound of a sugar, esp. of cane sugar, or saccharose, with the oxide of calcium, barium, or the like; a sucrate. See SUGAR.

sac-char'ic (sȧ-kăr'ĭk), *a.* Of, pertaining to, or obtained from, saccharine substances.

saccharic acid. *Org. Chem.* **a** A dibasic acid, $(CHOH)_4(CO_2H)_2$, occurring in three optically different modifications, *d-*, *l-*, and *i-*. Ordinary, or *d-*, saccharic acid is obtained as a deliquescent mass by oxidation of cane sugar (saccharose), grape sugar (*d*-glucose), and other carbohydrates. **b** A monobasic acid, $C_{12}H_7(OH)_4CO_2H$, got in solution by boiling invert sugar with milk of lime, and easily passing over into saccharin. *Isosaccharic acid* and *metasaccharic acid* are isomeric compounds of similar properties.

sac'cha-ride (săk'ȧ-rīd; -rĭd; 184), *n.* Also **-rid.** [See SACCHARINE.] *Chem.* **a** A compound with sugar; a saccharate. **b** A carbohydrate; specif. a monosaccharide or, as limited by some, any of the carbohydrates containing six, or a multiple of six, carbon atoms (including nearly all of natural occurrence). See CARBOHYDRATE.

sac'cha-rif'er-ous (-rĭf'ẽr-ŭs), *a.* [L. *saccharon* sugar + E. *-ferous.*] Producing sugar.

sac-char'i-fi-ca'tion (sȧ-kăr'ĭ-fĭ-kā'shŭn; săk'ȧ-rĭ-fĭ-), *n.* [L. *saccharon* sugar + E. *-fication.*] *Chem.* Act or process of saccharifying.

sac-char'i-fi'er (-kăr'ĭ-fī'ẽr; săk'ȧ-rĭ-fī'ẽr), *n.* [See SACCHARIFY.] An apparatus for saccharifying starch.

sac-char'i-fy (sȧ-kăr'ĭ-fī; săk'ȧ-rĭ-fī; 277), *v. t.*; **-FIED**(-fīd); **-FY'ING** (-fī'ĭng). [L. *saccharon* sugar + *-fy*: cf. F. *saccharifier.*] To convert into, or to impregnate with, sugar.

sac'cha-rim'e-ter (săk'ȧ-rĭm'ē-tẽr), *n.* [L. *saccharon* sugar + *-meter*: cf. F. *saccharimètre.*] Any device for measuring the amount of sugar in a solution. Hydrometers are often used for this purpose where the presence of other dissolved solids does not interfere. The polarizing saccharimeter is a polarimeter. With this different kinds of sugar can be distinguished from one another. The fermentation saccharimeter used in urinary analysis is a specially constructed glass tube in which the carbon dioxide evolved by the fermentation of sugar in the urine can be measured. —

sac'cha-rim'e-try (-trĭ), *n.* — **sac'cha-ri-met'ric** (-rĭ-mĕt'rĭk), **-met'ri-cal** (-rĭ-kăl), *a.*

sac'cha-rin (săk'ȧ-rĭn), *n.* [F., fr. L. *saccharon* sugar.] **1.** *Chem.* A bitter white lactone, $C_6H_{10}O_5$, easily formed by separation of water from saccharic acid (sense **b**), and formerly considered isomeric with cane sugar, or saccharose. **2.** Also **sac'cha-rine** (-rĭn; -rēn; 184). *Chem.* A white crystalline substance, $C_6H_4{<}_{SO_2}^{CO}{>}NH(o)$, remarkable for its sweetness, which is variously estimated at 300–500 times that of cane sugar. It is manufactured on a large scale from the toluene of coal tar, and is used in many ways as a sugar substitute, as in cases of diabetes. It is not a food in the sense that sugar is, and is antiseptic.

sac'cha-rine (săk'ȧ-rĭn; -rēn; 277), *a.* [F. *saccharin*, fr. L. *saccharon* sugar, Gr. *σάκχαρ*, *σάκχαρι*, *σάκχαρον*, Skr. *çarkarā*. Cf. SUGAR.] Of, pert. to, having the nature of, or producing, sugar; sweet; as, a *saccharine* taste; *saccharine* matter. — **sac'cha-rin'i-ty** (-rĭn'ĭ-tĭ), *n.*

sac'cha-rize (săk'ȧ-rīz), *v. t.*; **-RIZED** (-rīzd); **-RIZ'ING** (-rīz'-ĭng). To convert into, or to impregnate with, sugar. — **sac'cha-ri-za'tion** (-rĭ-zā'shŭn; -rī-zā'shŭn), *n.*

sac'cha-roid (săk'ȧ-roid), **sac'cha-roi'dal** (-roi'dăl), *a.* [L. *saccharon* sugar + *-oid*: cf. F. *saccharoïde.*] Resembling sugar; crystalline and granular, like loaf sugar.

sac'cha-rom'e-ter (-rŏm'ē-tẽr), *n.* A saccharimeter.

Sac'cha-ro-my'ces (-rō-mī'sēz), *n.* [NL.; Gr. *σάκχαρον* sugar + *μύκης*, *-ητος*, a fungus.] *Bot.* A rather large genus of unicellular ascomycetous fungi, the yeast fungi, distinguished by the facility with which they reproduce vegetatively by gemmation, although asci are occasionally developed. *S. cerevisiæ* is the common beer yeast; *S. pasteurianus* and one or two other species are also carefully cultivated in the operation of brewing. *S. ellipsoideus* is the wine ferment. See YEAST, FERMENTATION, 1.

sac'cha-rone (săk'ȧ-rōn), *n.* [*saccharin* + lactone.] *Chem.* A white crystalline substance, $C_6H_8O_6$, the lactone of saccharonic acid, got by oxidation of saccharin (sense 1).

sac'cha-ron'ic (-rŏn'ĭk), *a.* *Chem.* Designating, or pert. to, dibasic acid, $C_6H_{10}O_7$, formed from saccharin (1) by oxidation and passing immediately into its lactone, saccharone. It is a trihydroxy derivative of *a*-methyl glutaric acid.

sac'cha-rose (săk'ȧ-rōs), *n.* *Chem.* **a** Cane sugar. See SUGAR, 1. **b** Any of the compound sugars, including the disaccharides and trisaccharides; — distinguished, in an old classification, from *glucose* and *amylose*. **c** = CRYSTALLOSE.

Sac'cha-rum (-rŭm), *n.* [NL. See SACCHARINE.] **1.** *Bot.* A genus of large reedlike grasses of the Old World tropics. They have expanded panicles with very small paired spikelets intermixed with numerous silky hairs. SAC, SATCHEL, SACK to plunder.] **1.** A bag for holding and carrying goods of any kind; a receptacle of some pliable material, as cloth, leather, or the like; a large pouch.

2. A measure of capacity, being the quantity contained, or supposed to be contained, in a sack. It varies, and has varied, greatly, according to the substance and the locality; thus, the sack of Paris (used for plaster) was less than a bushel, and the sack of Hamburg (used for charcoal) nearly 6 bu. Formerly English statutes fixed the sack for flour and meal at 280 lbs.; salt, 5 bu.; coal, 3 bu.; wool, 364 lbs. The British sack since 1870 has been 4 imperial bu., but local usage varies from 3 bu. to 5 bu.; a sack of cotton is reckoned as 280 lbs. In the United States the sack is not a fixed measure, but, on the average, is 3 bu. or a little more; a sack of salt is reckoned as 215 lbs.; cotton, 140 lbs.; flour for export, 140 lbs.; ordinarily a sack of flour or meal weighs 100 lbs. A sack of Rio coffee is said to average 200 lbs., but in official export statistics *Brazilian sack* designates a weight of 60 kilos (132 lbs.).

3. Cloth for sacks; sacking; sackcloth. *Obs.*

4. Also *sacque*. [Perh. a different word.] During the 17th and 18th centuries, a loose flowing gown worn by women, hanging in folds from the shoulders; also, the back of such a gown. Cf. sac'ra-ment (săk'rȧ-mĕnt), *n.* [ME. *sacrament*, *sacrement*, L. *sacramentum* an oath, a sacred thing, a mystery, a sacrament, fr. *sacrare* to declare as sacred, *sacer* sacred: cf. F. *sacrement*. See SACRED.] **1.** The oath of allegiance taken by Roman soldiers; hence, a sacred ceremony used to impress an obligation; an oath, as in compurgation. *Obs.*

I'll take the *sacrament* on't. *Shak.*

2. The pledge or token of an oath or solemn covenant; hence, a sacred thing; a mystery. *Obs.* *Jer. Taylor.*

3. *Theol.* An outward and visible sign of an invisible or inward and spiritual grace; one of the solemn religious ordinances or ceremonies enjoined by Christ or by the church for the spiritual benefit of Christians. The Roman Catholic Church and the Eastern Church (in which they are called *mysteries*) recognize seven sacraments, viz., baptism, confirmation, the Eucharist, penance, extreme unction (Eastern Ch., unction of the sick), holy orders, and matrimony. In the churches of the Anglican Communion two sacraments, baptism and the Lord's Supper, or Eucharist, are recognized as ordained by Christ and "as generally necessary to salvation;" confirmation, ordination, matrimony, penance or penitence, etc., however, are regarded by many as sacraments of a subordinate character. The Protestant churches in general recognize but two sacraments, baptism and the Lord's Supper. The Friends, or Quakers, reject sacraments as unnecessary outward rites. The three chief opinions concerning the sacraments are: **a** That they are channels by which divine grace is conferred and are inherently efficacious. This is the view of the Roman Catholics, of the members of the Eastern church, and of many in the Anglican Communion. **b** That they are seals or ratifications of a covenant between God and the individual soul. This is the view generally held by Protestants. **c** That they are signs or badges of a Christian profession or that they are simply visible signs or symbols of something invisible and spiritual, and destitute of value and significance if the invisible or spiritual reality is wanting.

4. Esp., with *the* and often *cap.*, the Eucharist, Holy Communion, Lord's Supper, or Mass; also, *R. C. Ch.*, usually with the epithets *blessed* or *holy*, the consecrated Host.

sac'ra-men'tal (-mĕn'tăl), *a.* [L. *sacramentalis*: cf. F. *sacramental*, *sacramentel*.] **1.** Of or pert. to a sacrament or the sacraments; of the nature of a sacrament; sacredly binding; as, *sacramental* rites or elements.

2. Bound by a sacrament.

The *sacramental* host of God's elect. *Cowper.*

sac'ra-men'tal, *n.* A rite or an act, as the sign of the cross, similar to a sacrament but differing in being instituted by the church instead of by Christ; also, something, as a ceremony, connected with or used in a sacrament.

sac'ra-men'tal-ism (-ĭz'm), *n.* The doctrine and use of sacraments; the attaching of great importance to sacraments; esp., the doctrine that sacraments are inherently efficacious. (See SACRAMENT, 3 **a**.)

sac'ra-men'tal-ist, *n.* One who holds to sacramentalism.

sac'ra-men-ta'ri-an (-mĕn-tā'rĭ-ăn; 115), *a.* **1.** Of or pertaining to a sacrament or the sacraments; sacramental.

2. [*cap.*] Of or pertaining to the Sacramentarians.

sac'ra-men-ta'ri-an, *n.* [LL. *sacramentarius*.] *Eccl.* **a** [*cap.*] One who holds the sacraments to be simply visible symbols (see SACRAMENT, 3 **c**); — a name given in the 16th century and after to Zwinglians and Calvinists. **b** A sacramentalist. — **sac'ra-men-ta'ri-an-ism** (-ĭz'm), *n.*

sac'ra-men'ta-ry (săk'rȧ-mĕn'tȧ-rĭ), *a.* **1.** Of or pertaining to a sacrament or the sacraments; sacramental.

2. [*cap.*] Of or pertaining to the Sacramentarians.

Sac'ra-men'to-ry, *n.*; *pl.* **-RIES** (-rĭz). [LL. *sacramentarium*.] **1.** *R. C. Ch.* An ancient book containing the rites for Mass, the sacraments, the dedication of churches, and other ceremonies. There are a number of books of this kind, including the so-called **Leonine** (after Pope Leo I., 440-461, though part probably of later origin), the **Gelasian** (after Pope Gelasius, 492-496), the **Gregorian** (after Pope Gregory the Great, 590-604), which is a revision of the **Gelasian**, several **Gallican** Sacramentaries, and the so-called **Sacramentary of Serapion** (Egyptian, 4th century, after Serapion, bishop of Thmuis).

sa'cre (sā'k'r), *v. t.* [ME. *sacrem*, F. *sacrer*. See SACRED.] *Obs.* **a** To consecrate. **b** To worship.

sa'cred (sā'krĕd), *a.* [Originally p. p. of ME. *sacren* to consecrate, F. *sacrer*, fr. L. *sacrare*, fr. *sacer* sacred, holy, cursed. Cf. CONSECRATE, EXECRATE, SAINT, SEXTON.] **1.** Set apart by solemn religious ceremony; esp., made holy; set apart to religious use; consecrated; not profane or common; as, a *sacred* place; a *sacred* day; *sacred* service.

2. Relating to religion, or to the services of religion; not secular; religious; as, *sacred* history; *sacred* song.

3. Made inviolable or exalted by a divine or religious sanction; entitled by or as if by religious rules or belief to honor, reverence, or veneration; hallowed; as, the *sacred* name of mother.

Such neighbor nearness to our *sacred* [royal] blood
Should nothing privilege him. *Shak.*

4. Hence, not to be profaned or violated; inviolable.

5. Solemnly devoted, in a bad sense, as to evil, vengeance, or the like; accursed; baleful. *Archaic.*

Syn. — SACRED, HOLY. SACRED and HOLY (the stronger word) are often practically synonymous in the sense of consecrated to (or by) religion or some religious use, hallowed; as, "innumerable sound of hymns and *sacred* songs" (*Milton*); "hymns devout and *holy* psalms" (*id.*); "When as *sacred* light began to dawn in Eden" (*id.*); "Hail, *holy* light, offspring of Heaven first born!" (*id.*). But *holy* often emphasizes inherent or essential character; as, "Ye shall be *holy*, for I the Lord your God am *holy*" (*Lev.* xix. 2). *Sacred* (not *holy*) is opposed to *secular*; as, *sacred* history. See HOLINESS.

See SACRED ; FACT.] **1.** An offering to a deity or spiritual being of animal or vegetable life or of food, drink, incense, or the like. Typically sacrifice is made at or on an altar before an image or symbol of the deity, or, in case of offerings to the dead, at the grave. The sacrificial offering may be: (1) A **sacramental offering**, the offering being in part devoted to the god, in part consumed by the worshiper. (2) A **whole offering**, entirely devoted to the god, the **holocaust**, or **whole burnt offering**, being the ordinary form. (3) A **sin**, or **piacular**, offering, also devoted to the god or his ministers, and sometimes taking the form of a surrogate, or scapegoat, supposed to bear away the burden of the sin. A **libation**, or drink offering, is commonly of blood, wine, milk, or oil. Offerings of precious objects, such as images, memorial tablets, jewels, weapons, etc., intended to adorn the shrine or sanctuary, are called **votive offerings**, in distinction from the sacrificial. Cf. ALTAR, 1.

2. Anything consecrated and offered to God or to a divinity ; an immolated victim or an offering of any kind laid on an altar, or otherwise presented in the way of religious thanksgiving, atonement, conciliation, or the like.

3. Destruction or surrender of anything for the sake of something else ; giving up of some desirable thing in behalf of a higher object or one thought at the time to be more desirable, or devotion of it to a claim deemed more pressing ; the loss or disadvantage consequent upon such action ; also, the thing so devoted or given up ; as, the *sacrifice* of interest to pleasure, or of pleasure to interest.

4. A great lessening of the amount of, or a complete loss of, profit. *Tradesmen's Cant.*

5. *Baseball.* Short for SACRIFICE HIT.

☞ The pron. "-fīz" has, until recently, been preferred. Walker (c. 1800) notes that it is "the practice of most speakers and is accordingly so marked in all former pronouncing dictionaries." The pron. "-fis" prevails in present good usage, but "-fiz" is still widely used for the noun and prevails for the verb. Some good speakers say "-fĭs."

spring safety valve, in which the pressure is communicated by a spring. Varieties of this last type are: the **pop safety valve** (so called from the popping noise with which it opens), so constructed that when the valve lifts a little, a larger area is exposed to the steam or other pressure than when the valve is shut, so that it keeps open until the pressure falls considerably; and the **Ramsbottom safety valve,** used esp. on locomotives, in which two valves are pressed down by a single spring attached to a crosspiece prolonged to form a hand lever by which the valves may be eased up to test their adjustment. A safety valve devised so that no extra pressure can be put on it by the man in charge is called a **lockup safety valve.** **b** Sometimes, a similar valve opening inward to admit air to a vessel in which the pressure is less than that of the atmosphere, to prevent collapse; — called also *internal safety valve.*

It is used to color confectionery, liquors, varnishes, etc., sometimes also in cookery, and was formerly much used as a stimulant antispasmodic emmenagogue in medicine. **3.** An orange or deep yellow color, like that of the stigmas of *Crocus sativus.* **4.** *Old Chem.* A saffron-colored substance; as, *saffron,* or crocus, of Mars. Cf. CROCUS, 3.

saf'fron, *a.* Having the color of the stigmas of saffron flowers; deep orange-yellow; as, a *saffron* ribbon.

saffron crocus. = SAFFRON, 1. — **s. plum.** *Bumelia angustifolia,* or its yellow plumlike fruit. — **s. thistle,** safflower. — **s. wood,** the yellowish wood of a South African celastraceous tree (*Elæodendron crocetum*); also, the tree.

saf'ra-nine (săf'rȧ-nĭn; -nēn; 184), *n.* Also **-nin.** [See SAFFRON.] **1.** *Chem.* Any of a numerous class of artificial dyestuffs regarded as symmetrical diamino derivatives of azonium bases. Cf. INDAMINE. Properly, the safranines are bases, but they are used in their salts. These are usually red, and in solution can be made to undergo various color changes depending on dissociation phenomena. Blue safranines are also known. The simplest member is *phenosafranine,* $C_{18}H_{15}N_4OH$, now of theoretical interest only. *Tolusafranine,* $C_{19}H_{17}N_4OH$, is made by oxidizing a mixture of aniline, orthotoluidine, and tolylene diamine. **2.** *Com.* Any of various mixtures of safranine salts, designated by such marks as T, extra G, etc. Common safranine is a poisonous powder or paste, chiefly chloride of tolusafranine, used in cotton and silk dyeing as a substitute for safflower, in microscopy as a red stain, etc.

saf'rol (săf'rōl; -rŏl), *n.* [F. *safran* saffron + 2d *-ol.*] *Chem.* A poisonous substance, $C_{10}H_{10}O_2$, the chief constituent of oil of sassafras, occurring also in other plants, as the camphor tree. It is used for flavoring and perfuming, and in preparing piperonal. Chemically, it is the methylene ether of 1-allyl-3-4-dihydroxybenzene.

sag (săg), *v. i.;* SAGGED (săgd); SAG'GING (-Ing). [Akin to Sw. *sacka* to settle, sink down, LG. *sacken,* D. *zakken.*] **1.** To sink in the middle by weight or under applied pressure, below a horizontal line or plane or from the natural or original position; as, a cable supported by its ends *sags,* though tightly drawn; hence, to lean or settle from a vertical position, as a building or a door. **2.** To lose firmness or elasticity; to sink; droop; flag; bend; to fall gradually, as prices; to yield, as the mind or spirits, under the pressure of care, trouble, or the like. **3.** To loiter in walking; to idle along; to drag or droop. **to sag to leeward,** *Naut.,* to make leeway.

sag, *v. t.* To cause to sag.

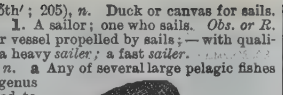
3. To be conveyed in a vessel on water; to pass by water; as, they *sailed* from London to Canton.
4. To begin a water voyage; as, we shall *sail* to-morrow.
5. To move smoothly through the air; to glide through the air without apparent exertion, as a bird or clouds; — often used with *in, out, along*, etc., with the implication of a certain air or show, as of pride, conceit, or indifference; as, the overdressed dowager *sailed* down the corridor.
6. To rush in; to begin vigorously to do something; — with *in* or *into;* as, he saw his work and *sailed* in. *Slang.*
Syn. — See FLOAT.
to sail *in, Naut.*, to sail as close to the wind as possible. *Rare.* — **to s. free,** *Naut.*, to sail with yards not braced in, or the boom hauled aft, as much as when close-hauled.
sail, *v. t.* **1.** To pass or move upon, as in a ship, by means of sails; hence, to move or journey upon (a body of water) by means of steam or other motive power.
2. To fly through; to glide or move smoothly through.

Sublime she *sails*
The aërial space, and mounts the winged gales. *Pope.*

3. To direct or manage the motion of; as, to *sail* a vessel.
sail'boat' (-bōt'), *n.* A boat usually propelled by a sail; — seldom applied to large vessels.
sail'cloth' (sāl'klŏth'; 205), *n.* Duck or canvas for sails.
sail'er (sāl'ẽr), *n.* **1.** A sailor; one who sails. *Obs. or R.*
2. A ship or other vessel propelled by sails; — with qualifying words; as, a heavy *sailer;* a fast *sailer.*
sail'fish' (-fĭsh'), *n.* **a** Any of several large pelagic fishes constituting the genus *Istiophorus*, related to the swordfish, but having teeth, scales, ventral fins of a few rays, and a very large dorsal fin. *I. nigricans* of the warmer parts of the Atlantic, the West Indies, etc., is the best-known species. **b** The basking shark. **c** A quillback sucker.



Sailfish (*Istiophorus nigricans*). ($\frac{1}{18}$)

sail hoop. *Naut.* A mast hoop of a fore-and-aft sail.
sail'ing, *p. pr. & vb. n.* of SAIL. Hence: *n.* [AS. *segling.*] **1.** Act of one that sails.
2. *Naut.* The art of managing a vessel; esp., the art of directing a ship to a given place according to the rules of navigation; navigation; also, the art or method of determining either (1) the course to be followed, or (2) the direction and distance to be sailed to reach a given point, or (3) the position of a ship from dead reckoning, involving the determination of two or more of the following elements: course, distance, difference in latitude, difference in longitude, and departure. In plane sailing the earth's curvature is neglected, and the distance, departure, etc., are equivalent or correspond to the sides of a plane right triangle formed by the meridian of the initial point, the parallel of the final point, and the rhumb line joining these points. In traverse sailing two or more consecutive courses are so considered, the differences of latitude and departures being added algebraically, and a single equivalent course and distance found. In spherical sailing the earth is regarded as a sphere (usually as a perfect sphere, though some modern nautical tables allow for its spheroidal shape), and allowance is made for the curvature of its surface. Kinds of spherical sailing are: **parallel sailing,** in which the course is along a parallel, and departure is the product of cosine latitude times the difference of longitude; **middle-latitude sailing,** in which the course cuts parallels and meridians obliquely, and departure is measured along the parallel of latitude midway between the latitude ends of the course; **Mercator sailing,** in which the differences in latitude, departure, etc., are considered in their relations as plotted upon a Mercator chart, and are found from a table of meridional parts; **great-circle sailing,** in which the ship follows a great-circle track, and the resulting problems are treated by spherical trigonometry; **composite sailing,** which combines parallel and great-circle sailing.
sailing master. *U. S. Navy.* Formerly, a warrant officer, next below a lieutenant, whose duties were to navigate the vessel, and under the executive officer to attend to the stowage, etc. The grade was merged in that of *master* in 1862.
sail lizard. A large lizard (*Istiurus amboinensis*) having a crested tail. It is found in the Moluccas.
sail loft. A loft or room where sails are cut out and made.
sail'mak'er (sāl'māk'ẽr), *n.* One whose occupation is to make or repair sails; specif., in the United States navy, a warrant officer in charge of all sails and articles of canvas. (The grade will before long become extinct.)
sailmaker's mate, in the United States navy, a petty officer of the first class, who assists, or acts as, the sailmaker.
sail'or (-ẽr), *n.* **1.** One who sails; esp., one who takes part in, or understands, the practical management of a vessel; a mariner; technically, a common seaman.
2. A kind of straw hat with a flat top and brim.
Syn. — SAILOR, MARINER, SEAMAN, are here compared esp. in their literary uses. SAILOR and MARINER are applied broadly to those whose occupation is to sail the seas; the words have wide connotation; SEAMAN, less common as a literary word, denotes one (rarely an officer) who helps to navigate a ship; as, "Thine island loves thee well, thou famous man, the greatest *sailor* since our world began" (*Tennyson*); "Slow sailed the weary *mariners* (*id.*); cf. "Mighty *Seaman*, this is he was great by land as thou by sea" (*id.*). See MARINE, NAVAL.

Sailor's-choice a

sail'or-ly, *a.* Characteristic of, or resembling, a sailor.
sail'or's-choice' (-ẽrz), *n.* **a** A small porgy (*Lagodon rhomboides*) of the coasts of the United States from Cape Cod south. **b** The pigfish (*Orthopristis chrysoptera*). **c** A grunt (*Hæmulon parra*), found from Florida to Brazil. **d** A pinfish (*Diplodus holbrooki*).
sain'foin (sān'foin), *n.* [F., fr. *sain* wholesome (L. *sanus;* see SANE) + *foin* hay (L. *fœnum*) confused with *saint* sacred (L. *sanctus;* see SAINT).] **a** A European fabaceous perennial plant (*Onobrychis sativa*), with pinnate leaves and spicate pink flowers. It is widely cultivated in the Old World for hay and pasturage. **b** An American tick trefoil (*Meibomia canadensis*). *Canada.* **c** A western American fabaceous herb (*Psoralea onobrychis*). *Local, U. S.*
saint (sānt; *unaccented, as in Saint Agnes,* sănt), *n.* [ME. *saint, seint*, F. *saint*, fr. L. *sanctus* sacred, properly p. p. of *sancire* to render sacred by a religious act, to appoint as sacred; akin to *sacer* sacred. Cf. SACRED, SANCTITY, SANCTUM, SANCTUS.] **1.** A person who is sanctified or consecrated; a holy or godly person; one characterized by, or eminent for, piety and virtue or purity and uprightness of life; esp., one regenerated and sanctified or undergoing sanctification; a true Christian, as being redeemed and consecrated to God. In the Old Testament *saint* is applied to any Israelite as one of the chosen people of God, and in the New Testament to any member of a Christian church.
2. One of the spirits of the blessed departed in heaven.
3. *Eccl.* One generally or officially recognized or acknowledged as preëminent for consecration, holiness, and piety; esp., such a one who is canonized by the church. Abbr. *St.* The title *Saint* was first given to the apostles, the Virgin Mary, and the martyrs, and later in the Eastern Church and in the Roman Catholic Church came to be conferred by the process of canonization (which see). It is also given to certain angels.

Salic law. **a** A code or compilation of the customary laws, chiefly relating to torts, crimes, and procedure, of the German tribes, including part of the laws of the Salian, or Merovingian, Franks. It was probably made near the end of the 5th century. **b** The provision of this law stating that "Of Salic land no portion shall come to a woman; but the whole of the inheritance of the land shall come to the male sex" (5th par., chap. 59); hence, the law or rule, consisting in an application of this law to succession to the crown, by which women were excluded from the throne in France in the contest for the French throne between Edward III. of England and Philip VI. of France in the 14th century and in Spain from 1714 to 1830.

Sal'i-ca'ce-æ (săl'ĭ-kā'sē-ē), *n. pl.* [NL. See SALIX.] *Bot.* A family of dicecious trees or shrubs (the willow family) constituting the order Salicales, and including only 2 genera, *Salix* and *Populus.* They have small apetalous flowers in aments. — **sal'i-ca'ceous** (-shŭs), *a.*

sal'i-ce'tum (-sē'tŭm), *n.; pl.* E. -TUMS (-tŭmz), L. -TA (-tä). [L., fr. *salix* willow.] A collection or plantation of living willows; a willow arboretum.

sal'i-cin (săl'ĭ-sĭn), *n.* [L. *salix, -icis*, a willow: cf. F. *salicine.* See SALLOW the tree.] *Chem.* A bitter white crystalline glucoside, $C_{13}H_{18}O_7$, found in the bark and leaves of several species of willow (*Salix*) and poplar. On hydrolysis (by the enzyme emulsin or otherwise) it yields glucose and saligenin. It is used in medicine as an antipyretic, antirheumatic, and tonic.

sa-li'cion-al (*sə-lĭsh'ŭn-ăl*), *n.* [F., fr. L. *salix* willow.] *Music.* An organ reed stop of delicate stringlike tone.

Sal'i-cor'ni-a (săl'ĭ-kôr'nĭ-ä), *n.* [NL., fr. LL. *salicornia* kali, perh. fr. L. *sal* salt + *cornu* horn; cf. LL. *sal kali* alkali.] *Bot.* A small genus of fleshy maritime chenopodiaceous herbs having thick, jointed, leafless stems bearing the minute flowers immersed in the upper nodes, forming a spike. The utricle contains a single seed. The species, called *glasswort* or *marsh samphire*, are widely distributed.

sal'i-cyl (săl'ĭ-sĭl), *n.* [*salicin* + *-yl.*] *Org. Chem.* The radical, $C_6H_4(OH)CO$, of salicylic acid. Cf. BENZOYL.

sal'i-cyl'age (-sĭl'ăj), *n.* Treatment of articles of food or drink with salicylic acid in order to preserve them.

sal'i-cyl-al (săl'ĭ-sĭl-ăl) } *n.* [*salicylic* + *alde-*
sal'i-cyl-al'de-hyde (-ăl'də-hīd) } *hyde.*] *Chem.* Salicylic aldehyde, $C_6H_4(OH)CHO$, a fragrant, colorless oil, reddening on exposure, found in the flowers of meadowsweet (*Spiræa*), and also got by oxidation of salicin, saligenin, etc.

sal'i-cyl-am'ide (-ăm'ĭd; -ĭd; 184), *n.* Also **-id.** *Chem.* Salicylic amide, $C_6H_4(OH)CONH_2$, a colorless crystalline compound got by treating methyl salicylate with strong ammonia. It is used as a substitute for salicylic acid.

sal'i-cyl'ate (-sĭl'āt), *n.* A salt or ester of salicylic acid.

sal'i-cyl'ate (-āt), *v. t.* To treat with salicylic acid.

sal'i-cyl'ic (-sĭl'ĭk), *a. Org. Chem.* Designating, or pertaining to, a white crystalline acid, $C_6H_4(OH)CO_2H$, formerly obtained by fusing salicin with potassium hydroxide, and now made in large quantities from phenol (carbolic acid) by action of carbon dioxide on heated sodium phenolate. It is used as an antiseptic, and in its salts in the treatment of rheumatism. Chemically, it is orthohydroxybenzoic acid. — **salicylic aldehyde.** See SALICYLAL.

sal'i-cyl'ide (săl'ĭ-sĭl'īd; -ĭd; 184), *n.* Also **-id.** [*salicylic* + anhyd*ride.*] *Chem.* A white crystalline substance, $(OC_6H_4CO)_4$, got by condensation of four molecules of salicylic acid in presence of phosphorus trichloride; — called also *tetrasalicylide*, as disting. from the condensation products *disalicylide*, $(C_7H_4O_2)_2$, and *polysalicylide*, $(C_7H_4O_2)_x$.

sal'i-cyl'ism (-ĭz'm), *n. Med.* The condition produced by the excessive use of salicylic acid or salicylates.

sal'i-cy-lu'ric (-sĭ-lū'rĭk), *a.* [*salicyl* + *uric.*] *Physiol. Chem.* Designating, or pertaining to, an acid, $C_9H_9O_4N$, found in the urine after the administration of salicylic acid. It is a salicyl derivative of glycocoll. Cf. HIPPURIC.

sa'li-ence (sā'lĭ-ĕns) } *n.* [See SALIENT.] **1.** Quality or
sa'li-en-cy (-ĕn-sĭ) } state of being salient.

2. That which is salient; a projection.

3. That which commands attention as prominent, striking, or noteworthy; as, lack of poetic *saliency.*

sa'li-ent (-ĕnt), *a.* [L. *saliens, -entis*, p. pr. of *salire* to leap: cf. F. *saillant.* See SALLY, *n.* & *v. i.*] **1.** Moving by leaps or springs; leaping; bounding; jumping.

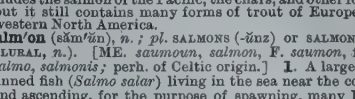
Sal'mo (săl'mō), *n.* [L., salmon.] *Zoöl.* A genus of which the salmon of the Atlantic (*S. salar*) is the type. In its broader and older (though still frequent) sense it includes all the salmons and trouts. In its restricted sense it excludes the salmon of the Pacific, the chars, and other forms, but it still contains many forms of trout of Europe and western North America.

salm'on (săm'ŭn), *n.*; *pl.* SALMONS (-ŭnz) or SALMON (see PLURAL, *n.*). [ME. *saumoun*, *salmon*, F. *saumon*, fr. L. *salmo*, *salmonis*; perh. of Celtic origin.] **1.** A large soft-finned fish (*Salmo salar*) living in the sea near the coasts, and ascending, for the purpose of spawning, many European and American rivers tributary to the northern North



Salmon (*Salmo salar*).

Atlantic. Its size, gameness, and beauty, and the excellence of its rich and characteristically flavored flesh, which is of an orange-pink color when cooked, make it the most highly esteemed of game fishes. It attains an average weight of 15 pounds. Though the salmon enters the streams in the spring or summer, the eggs are laid in the fall, and the young remain for a year or two in fresh water before descending to the sea. It varies much in color and appearance according to age, locality, season, etc., and various names (cf. FARR, GRILSE, SMOLT) distinguish these conditions. It has been practically exterminated in many rivers. See LANDLOCKED SALMON, OUANANICHE.

2. In a broader sense (often with a qualifying term), any of certain fishes closely allied to the above; esp., those of the genus *Oncorhynchus*, which live in, and ascend the rivers tributary to, the northern North Pacific. Six species are known, of which the quinnat salmon (*O. tschawytscha*) and the blueback, or red salmon (*O. nerka*), are the most important as food fishes. The salmons of this genus spawn but once, and die without returning to the sea.

3. In local or popular usage (often with qualifying terms), any of various other fishes having some point of resemblance (in some cases flesh of a pink color) to a true salmon; as: **a** A spiny-finned fish (*Arripis trutta*) of the coasts of Australia and New Zealand, little valued. **b** The barramundi (see CERATODUS). **c** A weakfish (*Cynoscion nebulosus*). *Southern U. S.*

4. A yellowish red, like the color of the salmon's flesh.

salm'on, *a.* Of the color called salmon.

salmon brick, an underburned brick.

salm'on-ber'ry (-bĕr'ĭ), *n.*; *pl.* -RIES (-Iz). **a** A large red-flowered raspberry (*Rubus spectabilis*) native of the Pacific coast from Alaska to California; also, its salmon-colored edible berry. **b** The Rocky Mountain species *R. parviflorus* or its fruit, — the western representative of the thimbleberry.

It is present in all animal fluids, esp. in the urine. Salt is obtained, commercially, from deposits in the earth. The commercial article contains small quantities of deliquescent salts (magnesium chloride, calcium chloride) which cause it to attract moisture.
2. *Chem.* By extension, any of a class of compounds formed when the acid hydrogen of an acid is partly or wholly replaced by a metal or a metal-like radical; as, ferrous sulphate ($FeSO_4$) is an iron *salt* of sulphuric acid (H_2SO_4). As a class, salts dissociate readily in solution, yielding cations other than hydrogen and anions other than hydroxyl. They are formed by the action of acids on metals (with elimination of hydrogen) and on oxides and hydroxides (with elimination of water), by the direct union of an acid with ammonia or an ammonia derivative, and in other ways. The names of salts of *-ous* acids end in *-ite* ; salts of *-ic* acids end in *-ate*, with a few exceptions. See *-ATE*, 3 **b**.
See ACID SALT, BASIC, *a.*, 2 **a**, NEUTRAL, *a.*, 4 **a**.

Salvation Army. A religious and charitable organization on military lines, which has for its aim the evangelization of the poor and degraded not reached by the churches. It began with an evangelistic movement started in 1865 by William Booth, an English Methodist minister, in the East End of London, and the organization was called the "Christian Mission" from 1869 until 1878. At this time a quasi-military character was given to the body. A distinctive feature is its daily open-air meetings, where conventionalities are thrown aside and all legitimate means of attracting popular attention are used. The Army's doctrines agree with those of the evangelical churches. The movement has spread to nearly all parts of the world.

F. *santonine.* See SANTONICA.] *Chem.* A white, crystalline, slightly bitter substance, $C_{15}H_{18}O_3$, occurring in santonica and in corresponding parts of other species of *Artemisia*, and used as an anthelmintic. In overdose it produces poisoning, causing all objects to appear yellow, or less often green or blue. Chemically, santonin is a derivative of naphthalene and is a lactone, combining with alkalies to form salts of **santonic**, or **santoninic, acid**, $C_{15}H_{20}O_4$. This acid in turn, by heating with alkalies, is converted into the isomeric **santoic**, or **santonic, acid**. With hydriodic acid and phosphorus santonin yields **santonous acid**, $C_{15}H_{20}O_3$, of which three optically different varieties are known.

San′to-rin′ earth, San′to-rin′ (sän′tō-rēn′), *n.* A kind of tufa from the island of Thera (also called Santorin or Santorini), consisting principally of a fine, light gray, siliceous material, used for making cement.

San′vi-ta′li-a (săn′vĭ-tā′lĭ-ȧ), *n.* [NL., prob. after one of the Italian family *Sanvitali.*] *Bot.* A small genus of Mexican asteraceous herbs having small heads with yellow or white rays, a flat receptacle, and naked or awn-tipped achenes. *S. procumbens* is often cultivated for ornamental edgings. Also [*l. c.*], a plant of this genus.

sap (săp), *n.* [AS. *sæp*; akin to OHG. *saf*, G. *saft*, Icel. *safi*; orig. uncert.; prob. fr. L. *sapa* must or new wine boiled thick.] **1.** The juices or fluid contents of a plant, esp. the watery solution which circulates through the vascular tissue in woody plants. The ascending current consists of the water of imbibition in which are dissolved various salts obtained from the earth. This so-called **crude sap** passes by diosmosis through the xylem portion of the vascular bundles to the chlorophyll-containing tissues (the leaves in most plants). Here it is subjected to photosynthesis (see PHOTOSYNTHESIS); the surplus water is transpired, and the newly formed carbohydrates and proteids are translocated through the phloëm or sieve tissue to the parts of the plant which may require them, the descending current being often called **elaborated sap**. In some plants, as the sugar cane, sugar maple, various palms, etc., the sap contains a high percentage of sugar. Popularly *sap* is sometimes applied to latex or to any fluid secretion. Botanists use it only as a convenient nontechnical term. See TRANSPIRATION; cf. CELL SAP **a**.
2. Any liquid or humor essential to life or health, or characteristic of a healthy, fresh, or vigorous condition; vitality; vigor; essential element; blood. *Shak.*
3. Sapwood, or alburnum.
4. *pl. Forestry.* Lumber containing much sapwood. It is inferior in quality to the grades called *firsts* and *seconds.*
5. *Quarrying.* Outside stone softened by weathering.
6. Any liquid taken with solid food. *Scot. & Dial. Eng.*
7. A saphead; a milksop; also (*Eng.*), an overzealous student. *Slang* (esp. in schools) *or Scot. & Dial. Eng.*

sap, *v. t.*; SAPPED (săpt); SAP′PING. [F. *saper* (cf. Sp. *zapar*, It. *zappare*), fr. *sape* a sort of scythe, LL. *sappa* a sort of mattock.] **1.** To subvert by digging or wearing away; to mine; undermine.
2. *Mil.* To operate against, or pierce, by saps.
3. To make unstable or infirm; to unsettle; weaken.
Ring out the grief that *saps* the mind. *Tennyson.*

sap (săp), *v. i.* *Mil.* To proceed by, or to execute, saps.

sap, *n.* *Mil.* An approach in the form of a narrow trench with its head protected by a parapet of earth thrown up from the trench, formerly by gabions filled with earth, pushed forward, usually in a zigzag direction to minimize enfilade fire, towards the works of a besieged place, to enable an assault to be delivered from close at hand, or mining to be done. When one side of the trench is protected by a parapet it is a **full**, or **single, sap**; when both, a **double sap**. Cf. *flying sap*, under FLYING.

sap′a-jou (săp′ȧ-jōō; *F.* sȧ′pȧ′zhōō′; 277), *n.* [F., fr. Tupi *saó-guaçú*, lit., big monkey.] **a** A capuchin monkey (genus *Cebus*). **b** Formerly, sometimes, a spider monkey.

sa-pan′ wood (sȧ-păn′). [Malay *sapang.*] A red dyewood obtained from the East Indian cæsalpiniaceous tree *Biancæa sappan*; also, the tree itself. The wood is a soluble redwood, and was the first of the so-called "brazilwoods" imported into Europe.

sap ball. Any large fungus of the genus *Polyporus.* They are sometimes used for razor strops. See POLYPORUS.

sa-pek′ (sȧ-pĕk′), *n.* Also **sa-pec′.** [F. *sapèque*, prob. fr. Malay *sa-paku* a string (of cash).] **a** Any of the Oriental coins better known in English as *cash.* **b** A bronze coin worth $\frac{1}{100}$ piaster issued by France for Indo China.

sap fagot. *Mil.* A short but very strong fascine, used to fill interstices between gabions at the head of a sap, when sandbags are not procurable.

sap′ful (săp′fōōl), *a.* Abounding in sap; sappy.

sap green. A dull olive-green coloring matter prepared from the juice of buckthorn berries; also, its color. It is now used chiefly in coloring food products.

Saph′a-ren′sian (săf′ȧ-rĕn′shăn), *a.* Designating, or pert. to, a method of chronology used in Spain from the 5th to the 12th century, by which the years were numbered from 38 B. C., the date of the conquest of Spain by Augustus.

sap′head′ (săp′hĕd′), *n.* A weak-minded, stupid fellow; a milksop. *Colloq.* — **sap′-head′ed**, *a.* *Colloq.*

sa-phe′nous (sȧ-fē′nŭs), *a.* [OF. *saphené* a vein of the leg, F. *saphène*; cf. Sp. *safina*; fr. Ar. *safīn*, *sāfīn*, prob. fr. Gr. σαφηνής manifest.] *Anat.* **a** Designating the two principal superficial veins of the legs. The **internal**, or **long, saphenous vein** begins at the foot and passes up the inside of the leg, going in front of the internal malleolus, and behind the internal femoral condyle, and, entering the saphenous opening, joins the femoral vein. The **external**, or **short, saphenous vein** passes behind the outer malleolus and up the back of the leg, joining the popliteal at the knee. **b** Pertaining to, or in the region of, the saphenous veins; as, the **internal**, or **long**, and **external**, or **short, saphenous nerves**, cutaneous branches of the anterior crural and the popliteal nerves, which accompany the above veins; the **saphenous opening**, an opening in the broad fascia of the thigh through which the internal saphenous vein passes.

sap′id (săp′ĭd), *a.* [L. *sapidus*, fr. *sapere* to taste: cf. F. *sapide.* See SAPIENT, SAVOR.] Having the power of affecting the organs of taste; possessing savor, or flavor. "*Sapid*, visible, audible objects." *J. Martineau.*

sa-pid′i-ty (sȧ-pĭd′ĭ-tĭ), *n.* [Cf. F. *sapidité.*] Quality or state of being sapid; taste; savor; savoriness.

sa′pi-ence (sā′pĭ-ĕns), *n.* [L. *sapientia*: cf. F. *sapience.* See SAPIENT.] **1.** Quality of being sapient; wisdom; sageness; profound knowledge; also, practical wisdom or common prudence; — often used ironically. *Chaucer.*
2. [*cap.*] The apocryphal Book of Wisdom. *Obs.*
3. The rational or intellectual powers. *Obs. or R.*

sa′pi-ent (-ĕnt), *a.* [L. *sapiens*, *-entis*, p. pr. of *sapere* to taste, to have sense, to know. See SAGE, *a.*] **1.** Wise; sage; discerning; — often in irony. "*Sapient* sir, sit here." *Shak.*
2. Affording knowledge or wisdom; as, a *sapient* plant. *R.*
Syn. — Sagacious, knowing, wise, discerning. See SHREWD.

sa′pi-en′tial (-ĕn′shăl), *a.* [L. *sapientialis.*] Having, affording, or expounding, wisdom. — **sa′pi-en′tial-ly**, *adv.*
sapiential books, *Bib.*, the books of Proverbs, Ecclesiastes, Wisdom, and Ecclesiasticus. *Obs.*

Sap′in-da′ce-æ (săp′ĭn-dā′sē-ē), *n. pl.* [NL. See SAPINDUS.] *Bot.* A family of trees, shrubs, or rarely herbaceous vines (order Sapindales), of about 118 genera and over 1,000 species, almost entirely of the tropics; the soapberry family. They have mostly pinnate or palmate exstipulate leaves, diœciously polygamous flowers, and baccate or capsular, often edible, fruit. *Sapindus*, *Nephelium*, *Paullinia*, and *Cardiospermum* are prominent genera, including many ornamental plants. — **sap′in-da′ceous** (-shŭs), *a.*

Sap′in-da′les (-lēz), *n. pl.* [NL.] *Bot.* **a** In Lindley's classification, an alliance including the soapworts and allies. **b** In modern taxonomy, an order of archichlamydeous dicotyledonous plants comprising 20 families, including the Anacardiaceæ, Aquifoliaceæ, Celastraceæ, Aceraceæ, and Sapindaceæ. They have the stamens inserted on a disk, and the ovary with one or two ovules in each cell.

Sa-pin′dus (sȧ-pĭn′dŭs), *n.* [NL.; L. *sapo* soap + *Indicus* Indian.] *Bot.* A genus of tropical and subtropical trees, the soapberries, typifying the family Sapindaceæ, having abruptly pinnate or unifoliolate leaves and tetramerous flowers succeeded by a fleshy or leathery berry. Several species occur in the southern United States.

Sa′pi-um (sā′pĭ-ŭm), *n.* [NL., fr. L. *sappium*, var. of *sap(p)inus* a kind of fir or pine tree.] *Bot.* A genus of euphorbiaceous trees and shrubs of wide distribution in warm regions. They have entire leaves and small spicate or racemose flowers with 2 stamens, succeeded by a loculicidal capsule. The acrid milky juice of *S. indicum* is used in staining rattan. The bark of some South American species is used for tanning. *S. sebiferum* is the tallow tree.

sap′ling (săp′lĭng), *n.* **1.** A young tree; specif., a young forest tree with a trunk not above four inches in diameter.
2. A youth. "You 're a young, foolish *sapling.*" *Shak.*
3. A greyhound whelped prior to a given running season but in the same calendar year.

sapling cup *or* **tankard.** A cask-shaped wooden ale tankard; a stave tankard.

sap′o-dil′la (săp′ō-dĭl′ȧ), *n.* [Sp. *sapotillo*, *zapotillo*, dim. of *zapote.* See SAPOTA.] **a** A large tropical American sapotaceous tree (*Sapota zapotilla*), with hard reddish durable wood and handsome evergreen foliage. It is one of the trees yielding chicle gum. **b** The fruit of this tree. It has a rough brownish skin and very sweet yellowish pulp. In the Spanish West Indies it is called *nispero*; in the British West Indies, *naseberry*; in the Philippines, *chico.*

$\frac{1}{4}$ Sapodilla, Leaves and Fruits.

sap′o-na′ceous (săp′ō-nā′shŭs), *a.* [L. *sapo*, *-onis*, soap, of Teutonic origin, and akin to E. *soap.* See SOAP.] Resembling soap; having the qualities of soap; soapy. — **sap′o-nac′i-ty** (-năs′ĭ-tĭ), *n.*

Sap′o-na′ri-a (-nā′rĭ-ȧ; 115), *n.* [NL., fr. L. *sapo* soap. See SAPONACEOUS.] *Bot.* A genus of silenaceous herbs, natives of the Old World, with large flowers with a tubular or gibbous calyx, five clawed petals, and a 4-valved capsule. *S. officinalis* is the common soapwort, or bouncing Bet.

sa-pon′i-fi′a-ble (sȧ-pŏn′ĭ-fī′ȧ-b'l), *a.* Capable of being saponified.

sa-pon′i-fi-ca′tion (-fĭ-kā′shŭn), *n.* [Cf. F. *saponification.* See SAPONIFY.] Act, process, or result, of soap making; conversion into soap; chemically, the decomposition of a fat by alkali, with the formation of a soap, or salt of the fatty acid, and glycerin; hence, *Chem.*, the decomposition of any ester into the corresponding alcohol and acid (either free or in the form of a salt); also, the similar production of an acid from some other derivative.

saponification value *or* **number.** *Chem.* A value obtained in the analysis of oils, fats, etc., being the number of milligrams of potassium hydroxide neutralized, on saponification, by one gram of substance. The **saponification equivalent** is found by dividing the above number into the molecular weight of potassium hydroxide and multiplying by 1,000; it indicates the number of grams of the fat saponified by a gram molecule of any alkali.

sa-pon′i-fi′er (sȧ-pŏn′ĭ-fī′ẽr), *n.* That which saponifies; specif., any reagent used to cause saponification.

sa-pon′i-fy (-fī), *v. t. & i.*; -FIED (-fīd); -FY′ING (-fī′ĭng). [L. *sapo*, *-onis*, soap + *-fy*: cf. F. *saponifier.*] To convert into soap; to subject to, or to undergo, saponification.

sap′o-nin (săp′ō-nĭn), *n.* [L. *sapo*, *-onis*, soap: cf. F. *saponine.*] *Chem.* Any of a group of glucosides occurring in many plants, as in soapwort, soapbark, etc., and characterized by their property of producing a soapy lather. Some, at least, appear to form a homologous series of the formula $C_nH_{2n-8}O_{10}$. Commercial saponin is extracted from soapbark as a white, amorphous, poisonous powder.

sap′o-nite (-nīt), *n.* [Sw. *saponit*, fr. L. *sapo*, *-onis*, soap.] *Min.* A hydrous silicate of magnesium and aluminium, occurring in soft, soapy, amorphous masses, filling veins and cavities in serpentine, diabase, etc. Sp. gr., 2.24–2.30.

sap′o-rif′ic (-rĭf′ĭk), *a.* [L. *sapor* taste + E. *-fic.*] Having the power to produce the sensation of taste; producing taste, flavor, or relish.

sap′o-ros′i-ty (-rŏs′ĭ-tĭ), *n.* The quality of a body by which it excites the sensation of taste.

sap′o-rous (săp′ō-rŭs), *a.* [L. *saporus*, *saporosus*, that relishes well, savory, fr. *sapor* taste.] Having flavor or taste.

Sa-po′ta (sȧ-pō′tȧ), *n.* [NL., fr. Mex. *tzapotl.* Cf. SAPODILLA.] **a** *Bot.* A small genus of tropical American trees typifying the family Sapotaceæ, restricted by some to *S. zapotilla.* See SAPODILLA. **b** [*l. c.*] The sapodilla plum.

Sap′o-ta′ce-æ (săp′ō-tā′sē-ē), *n. pl.* [NL. See SAPOTA.] *Bot.* A family of trees or shrubs (order Ebenales), consisting of about 31 genera and 400 species, widely distributed in tropical regions; the sapodilla family. They have milky juice, coriaceous leaves, and axillary flowers succeeded by fleshy, often edible, fruits. The stamens are in two or three whorls, borne on the corolla, often alternating with staminodia; the ovary is superior, 2-many-celled. Many genera, esp. *Palaquium*, yield gutta-percha, various gums, etc. *Sapota* is the sapodilla, and *Achras* (syn. *Lucuma*) is the marmalade tree. *Bumelia*, *Mimusops*, *Chrysophyllum*, and *Illipe* are other genera. — **sap′o-ta′ceous** (-shŭs), *a.*

sa-po′te (sä-pō′tā), *n.* [Sp.] **1.** In the West Indies: **a** The sapodilla. **b** The marmalade tree or its fruit.
2. In the Philippines, a date plum (*Diospyros ebenaster*).

sa'ti-ate (-āt), *v. t.*; SA'TI-AT'ED (-āt'ĕd); SA'TI-AT'ING (-āt'ĭng). **1.** To satisfy the appetite or desire of; to feed to the full; to furnish enjoyment to, to the extent of desire.
2. To fill beyond natural desire; to gratify to repletion or loathing; to surfeit; glut.
3. To saturate. *Obs.* *Sir I. Newton.*
Syn. — SATIATE, SATE, SURFEIT, CLOY, GLUT, GORGE. To SATIATE (lit. and fig.) is to feed to the full or to repletion; SATE is stronger, and is chiefly poetical or elevated; as, "Addison . . . had himself not above three or four notes in poetry, sweet enough, indeed, like those of a German flute, but such as soon tire and *satiate* the ear" (*Gray*); "So lust, though to a radiant angel linked, will *sate* itself in a celestial bed" (*Shak.*). SURFEIT signifies overeating, with consequent nausea or disgust, an implication which is heightened in CLOY to that of loathing; as, "A grown person *surfeiting* with honey, no sooner hears the name of it, but his fancy immediately carries sickness and qualms to his stomach" (*Locke*); "Their minds would be gorged and *surfeited* by the logical operation" (*J. H. Newman*); "*Cloy* thy lips with loathed satiety" (*Shak.*); "Is it [love] not . . . all oil, all sugar? Zounds! it is enough to *cloy* the sharp-set appetite of a parson" (*Fielding*). GLUT suggests greediness or (esp.) overloading; it sometimes implies that repletion is reached before greed is sated; to GORGE is to stuff, as it were, to the throat; as, "Is this your fate, to *glut* the dogs with gore?" (*Pope*); seeming rather *glutted* than *sated*" (*Goldsmith*); "being with his presence *glutted, gorged,* and full" (*Shak.*); "How can we *gorge* the invisible serpent hidden at the bottom of our well — *gorge* it so that it may sleep?" (*Mrs. Humphry Ward*). See CONTENT, EPICURE.

sat'u-rate (-rāt), *v. t.*; -RAT'ED (-rāt'ĕd); -RAT'ING (-rāt'ĭng). [L. *saturatus*, p. p. of *saturare* to saturate, fr. *satur* full of food, sated. See SATIRE.] **1.** To cause to become completely penetrated, impregnated, or soaked; to fill fully; to treat (with something) till no more can be taken up, as water with salt or iron with magnetism.

Fill and *saturate* each kind
With good according to its mind. *Emerson.*

2. *Chem.* To satisfy the affinity of; to cause to combine till there is no further tendency to combine; to neutralize; as, to *saturate* an acid with an alkali.

Syn. — SATURATE, SOAK, DRENCH, STEEP, IMPREGNATE are here compared esp. with reference to their fig. uses. That is SATURATED which is completely imbued with something, or which has absorbed all that it can hold; SOAK implies saturation esp. by immersion, DRENCH, esp. by pouring; but the words are somewhat freely interchangeable; as, to *saturate* a sponge, to *soak* dried fruit, to be *drenched* in a shower; "*Saturated* with experience of a particular class of materials, an expert can hardly feel a newly reported fact is probable or not" (*W. James*); "He is the man best qualified as a translator of Homer, who has *drenched*, and *steeped*, and *soaked* himself in the effusions of his genius, till he has imbibed their color to the bone" (*Cowper*); "The solid mountains shone . . . *drenched* in empyrean light" (*Wordsworth*); "the new life with which it *drenches* the spirits even to intoxication" (*Shelley*). STEEP and IMPREGNATE apply to that which is imbued, permeated, or infused with something; as, "*steeped* in dialectics" (*Hazlitt*); "To these homely subjects he communicated the rich commentary of his nature; they were all *steeped* in Burns" (*Stevenson*); "When my mind was, as it were, strongly *impregnated* with the Johnsonian æther" (*Boswell*); "this poem, everywhere *impregnated* with original excellence" (*Wordsworth*). See PERMEATE, DIP.

2. Very deep or intense; — applied to colors.

sat'u-rat'ed (-rāt'ĕd), *pret. & p. p.* of SATURATE. Specif.: *p. a.* **1.** Filled to repletion; holding by absorption, solution, combination, or the like, all that is possible; as, *saturated* garments; *a saturated* solution of salt.

2. *Optics.* Not diluted with white; — said of pure colors like those of the spectrum.

saturated compound, *Chem.*, a compound which does not tend to form addition products; — applied esp. to such compounds as the paraffins and their derivatives, as distinguished from those of the ethylene series, etc. — **s. solution,** the most concentrated solution that can remain, under given conditions of temperature, etc., in presence of an excess of the dissolved substance. — **saturated steam,** steam in a saturated vapor; sometimes, wet steam. — **s. vapor** *or* **vapour,** *Physics*, vapor which, being at the temperature of the boiling point corresponding to its pressure, cannot be compressed or cooled without condensing.

sat'u-ra'tion (săt'ū-rā'shŭn), *n.* [L. *saturatio*: cf. F. *saturation*.] **1.** Act or process of saturating, or state of being saturated; complete penetration or impregnation.

2. *Optics.* Freedom from mixture or dilution with white; purity; — said of colors.

3. *Steam Engin.* In relation to marine boilers, the degree of saturation of the water with salt, usually expressed as the ratio of parts of salt to 32 parts of water, ordinary sea water being assumed to contain $\frac{1}{32}$ of its weight of salt.

sat'u-ra'tor (săt'ū-rā'tẽr), *n.* [L.] One that saturates; a device for saturating; specif.: **a** In the destructive distillation of coal, a tank containing sulphuric acid through which the vapors are passed to remove ammonia. **b** An apparatus for supplying moist air to rooms, etc. **c** An apparatus for saturating oxygen with ether vapor, used in a modification of the limelight. **d** A device for injecting water spray into heated compressed air to cool the air. **e** *Manuf.* A tank or vat in which a saturated solution is made.

Sat'ur-day (săt'ŭr-dā), *n.* [ME. *Saterdai*, AS. *Sæterdæg*, *Sæternesdæg*, *Sæternesdæg*, lit., Saturn's day, fr. L. *Saturnus* Saturn + AS. *dæg* day; cf. L. *dies Saturni*.] The seventh and last day of the week; the day following Friday and preceding Sunday; the day of the Jewish Sabbath.

Sat'urn (săt'ŭrn), *n.* [L. *Saturnus*, lit., the sower, fr. *serere*, *satum*, to sow. See SEASON; cf. SATURNINE.]

1. *Rom. Relig.* An ancient god of the seed sowing, whose temple in Rome, founded in 497 B. C., was used as a state treasury. In 217 B. C. the worship of Saturn was conformed to that of the Greek Cronus, with whom the Roman god was identified and in whose type his images were made. Thence arose the myth that Saturn in Italy, as Cronus in Greece, had been king during an ancient golden age and founder of Italian civilization. See SATURNALIA, OPS.

2. *Astron.* One of the planets, next in magnitude to Jupiter, and next more remote from the sun, remarkable for its engirdling system of thin rings. Symbol, ♄. It is the sixth major planet from the sun and the most remote planet known to the ancients. The surface on Saturn shows markings somewhat similar to those of Jupiter, but fainter. The planet's density is only about $\frac{1}{8}$ that of the earth. It rotates on its axis in about $10\frac{1}{4}$ hours. (For other elements, see PLANET, *Table.*) Spectroscopic observations have established the theory that the rings are composed of a dense swarm of small solid bodies. The eight well-known satellites of Saturn, beginning with the innermost, are: *Mimas*, *Enceladus*, *Tethys*, *Dione*, *Rhea*, *Titan*, *Hyperion*, and *Japetus*, the brightest being Titan. A ninth satellite, *Phœbe*, fainter and more distant than any of the others, was discovered by photography in 1899, and a tenth, *Themis*, in 1905, between Titan and Hyperion.

Saturn, 2.

3. *Alchem. & Old Chem.* The metal lead.

4. *Her.* Sable, in blazoning by the planets.

Sat'ur-na'li-a (săt'ŭr-nā'lĭ-ă), *n. pl.*; rarely, *n. sing.*, **Sat'ur-na'le** (-lē). [L., neut. pl. of *Saturnalis* of or belonging to Saturn. See SATURN.] **1.** *Rom. Relig.* The festival of Saturn, beginning Dec. 17, on which day the official rites were celebrated. Unofficially it was a sort of carnival, in which masters served their slaves, while a king chosen by lot presided over the feast.

2. [*l. c.*] A period or occasion of general license, in which the passions or vices have riotous indulgence.

Sat'ur-na'li-an (-ăn), *a.* **1.** Of or pert. to the Saturnalia.

2. [*l. c.*] Of unrestrained and intemperate jollity; riotously merry; dissolute. "*Saturnalian* amusement." *Burke.*

Sa-tur'ni-an (sā-tûr'nĭ-ăn), *a.* [L. *Saturnius*.] **1.** Of or pert. to Saturn, whose age or reign is conceived to have been the golden age; hence, resembling the golden age; distinguished for peacefulness, happiness, contentment.

2. *Astron.* Of or pertaining to the planet Saturn.

Saturnian atom, *Physics*, an atom consisting of a group of negatively charged electrons inside a mass of positive electrification, and revolving about the center of the positive charge at such a rate as to be in stable equilibrium under their own repulsive forces and under attraction to the center of the positive charge varying directly as the first power of the distance from this center. — **S. verse,** *Pros.*, an early Italian meter employed in Latin poetry before the adoption of Greek verse forms. Its exact nature is disputed, some taking it as quantitative —

Virûm mihi Camēna, ♯ insecĕ versûtum,

which has been compared with —

The queen | was in | the kitch | en | eating | bread and | honey;

while others explain it as accentual; thus, —

Virum mihi, Camēna, ♯ insecē versûtum.

scald'ing (skôl'dĭng), *p. pr & vb. n.* of SCALD. Specif. : *vb. n.* **a** Act or process of burning by steam or hot liquid. **b** A quantity scalded or to be scalded. *Dial. Eng.* **c** *pl.* Things cooked or prepared by scalding. *Obs. or Dial.*
scale (skāl), *n.* [ME. *scale*, fr. OF. *escale* cup, of Teutonic origin ; cf. D. *schaal* a scale, bowl, G. *schale*, OHG. *scāla*, Dan. *skaal* drinking cup, bowl, dish, Sw. *skål*, Icel. *skál* balance, dish, akin to AS. *scāle.*] **1.** A drinking vessel ; a bowl ; a cup. *Obs. Ancren Riwle.*
2. The dish of a balance ; hence, usually *pl.*, the balance itself ; an instrument or machine for weighing ; as, to turn the *scale*. Also used fig. ; as, his fate was in the *scale* ; the *scales* of Justice.
3. [*cap.*] *pl. Astron.* The sign or constellation Libra ; the Balance.
scale, *v. t.* ; SCALED (skāld) ; SCAL'ING (skāl'ĭng). **1.** To weigh in scales ; also, to measure ; compare.

Scaling his present bearing with his past. *Shak.*

2. To have a weight of ; to weigh.
3. To make, or to lay out so as to be, of exact weight, quantity, or dimensions ; specif., to divide into exact parts by weight ; as, to *scale* dough into loaves. *Colloq.*
scale, *n.* [ME. *scale*, OF. *escale*, F. *écale*, of Teutonic origin ; cf. D. *schaal*, G. *schale*, OHG. *scala*, Dan. & Sw. *skal* a shell, Dan. *skiæl* a fish scale, Goth. *skalja* tile, akin to AS. *scealu* husk, and E. *shale, shell.* Cf. SHALE, SHELL.]
1. In animals, a small, more or less flattened, rigid, and definitely circumscribed plate forming part of the external body covering. Scales of fishes consist of dermal bony tissue, and in recent forms are commonly in imbricated rows, their posterior edges partly overlapping. In some cases they are coated with ectodermic enamel. The chief types of fish scales are *placoid, ganoid, cycloid*, and *clenoid.* The scales of reptiles, and of the legs of birds, are horny, and are simply circumscribed and slightly differentiated areas of the epidermis. Those of a few mammals (as certain anteaters) are epidermic outgrowths. Those of invertebrates, as on the wings of Lepidoptera, are commonly chitinous outgrowths.
2. Hence, any layer or leaf of metal suggestive of a fish scale ; a flake ; as, a *scale* of iron, bone, etc. ; also, a scab.
3. Either of the pieces fastened one on each side of the tang of a knife, weapon, etc., to form the handle.
4. Short for SCALE INSECT.
5. *Bot.* **a** One of the cataphyllary leaves serving in most seed plants to protect a bud before expansion ; a bud **scale.** See BUD, I, BUD SCALE. **b** Any thin, membranaceous, chaffy, or woody bract ; as, the *scale* of an alder catkin. **c** One of the chaffy paleæ clothing the stipe in some ferns. **d** The small appendage at the base of the petal in Silenaceæ, etc. **e** One of the disklike trichomes which make up the characteristic silvery or scurfy pubescence of the foliage in certain plants, as *Elæagnus.*
6. Crude paraffin, obtained in petroleum refining by filtering from the heavier oils.
7. A hard incrustation deposited on the inside of a vessel in which water is heated, as a steam boiler. The scale from sea water consists principally of calcium sulphate ; from fresh water, of the carbonates of calcium, magnesium, and iron, calcium sulphate, etc. Being a nonconductor of heat, scale in any amount is very objectionable.
8. *Metal.* The black scaly coating of oxide (esp. magnetic oxide, Fe_3O_4) on the surface of heated iron, as in forging, rolling, etc. ; — called specif. *hammer scale, forge scale, mill scale*, etc. Also, a similar coating upon other metals.
9. A film ; a thin coating or covering ; as, a *scale* of ice.
scale (skāl), *v. t.* **1.** To strip or clear of scales or scale.
2. To take off in thin layers or scales, as tartar from the teeth ; to pare off, as a surface ; to remove as if consisting of a scale or scales ; also, to take off the surface of ; to peel ; husk, as chestnuts. "If all the mountains were *scaled*, and the earth made even." *T. Burnet.*
3. *Gun.* To clean, as the inside of an old-time cannon, by the explosion of a small quantity of powder. *Obs.*
4. To form into scales, or to form scale on ; as, leprosy *scales* one's skin ; lime water *scales* a boiler.
5. *Obs. or Scot. & Dial. Eng.* **a** To scatter ; disperse ; as, to *scale* a crowd. **b** To spread, as manure. **c** To spill.
6. **a** To cause to skip on a water surface by throwing, as a thin, flat stone. **b** To throw or project, as a thin, flat stone or a clam shell, so that the edge cuts the air.
scale, *v. i.* **1.** To separate and come off in thin layers or laminæ ; as, some sandstone *scales* by exposure.
2. To separate ; to scatter. *Obs. or Scot. & Dial. Eng.*
scale, *n.* [L. *scalæ*, pl., *scala*, staircase, ladder ; akin to *scandere* to climb. See SCAN ; cf. ESCALADE.] **1.** A ladder ; a series of steps ; a means of ascending. *Obs. or R.*
2. Hence, anything graduated, esp. when employed as a measure or rule, or marked by lines at regular intervals. Specif. : **a** A mathematical instrument, consisting of a slip of wood, ivory, or metal, with one or more sets of spaces graduated and numbered on its surface, for measuring or laying off distances, dimensions, etc., as in drawing, plotting, etc. See GUNTER'S SCALE. **b** A series of spaces marked by lines, representing proportionately larger distances ; as, a *scale* of miles, feet, etc., for a map or plan. **c** A basis for a numeral system ; as, the decimal or binary *scale.*
3. *Music.* **a** A graduated series of tones, ascending or descending in order of pitch according to a specified scheme of their intervals. The typical interval scheme of the ancient Greek scales was the tetrachord ; of the medieval scales, the hexachord ; and of the modern scales, the octave. According to the number of tones it has to the octave, a scale is *pentatonic, heptatonic*, etc. A modern **diatonic scale** is properly the gamut, or ascending or descending tone of any *key* (which see) in the major or minor mode, though *scale* is commonly synonymous with *mode*, its chief forms being classified as : (*a*) The **major scale**, having its tones the following order of intervals from the keynote (C, for example), C-D-E-F-G-A-B-C, the sign ‑ denoting a whole step, ⌣ a half step. The value of these intervals (when pure ; see below), expressed in the vibration ratios of the successive tones, are as in this typical scale :

D to C, E to D, F to E, G to F, A to G, B to A, c to B.
9 : 8, 10 : 9, 16 : 15, 9 : 8, 10 : 9, 9 : 8, 16 : 15.

(*b*) The **minor scale**, having three forms : (*a*) the **original minor**, with the same tones as the relative major, but with its intervals in the following order (assuming A as keynote), A-B-C-D-E-F-G-a ; (*b*) the **harmonic minor**, with its interval order as follows, A-B-C-D-E-F+G♯-a, the sign + denoting a step and a half ; (*c*) the **melodic minor**, with interval order as in the following, A-B-C-D-E-F♯-G♯-a (ascending), a-G-F-E-D-C-B-A (descending). The **chromatic scale** consists of a diatonic scale, with the five intermediate semitones — in all thirteen tones to the octave. A scale is **pure** when its tones have exact harmonic relations to the keynote, as a major scale when its tones have the following vibration ratios to the keynote : $k\text{-}\frac{9}{8}k\text{-}\frac{5}{4}k\text{-}\frac{4}{3}k\text{-}\frac{3}{2}k\text{-}\frac{5}{3}k\text{-}\frac{15}{8}k\text{-}2k$; it is **tempered** when, as in modern keyboard instruments, slight alterations of these ratios are introduced. See TEMPERAMENT. **b** A scale on a given keynote ; as, the *scale* of G. It is understood to be major, unless otherwise mentioned. **c** The compass of a voice or instrument. **d** The ratio between the width and the length of an organ pipe, bringing giving fullness and sonority of tone, narrowness giving thin and stringlike tones.
4. Gradation ; succession of ascending and descending steps and degrees ; progressive series ; scheme of comparative rank or order ; a graded system ; as, a *scale* of being ; a *scale* of wages ; a *scale* of taxation ; a *scale* of tints.
5. Relative dimensions, without difference in proportion of parts ; size or degree of the parts or components in any complex thing, compared with other like things ; esp., the relative proportion of the linear dimensions of the parts of a drawing, map, model, etc., to the dimensions of the corresponding parts of the object that is represented ; as, a map on a *scale* of an inch to a mile.

F *scapolite*.] *Min.* **a** A mineral of the scapolite group, intermediate in composition between meionite and marialite and containing 46–54 per cent of silica; — called also *wernerite*. It resembles feldspar when massive, but has a fibrous appearance and higher sp. gr. (2.66–2.73). **b** Any member of the scapolite group.

scapolite group. *Min.* A group of minerals crystallizing in the pyramidal division of the tetragonal system, white or grayish white in color when pure, and consisting essentially of silicates of aluminium, calcium, and sodium. All the species, viz., meionite, wernerite (common scapolite), mizzonite (dipyre), marialite, and sarcolite, may be considered as isomorphous mixtures, in varying proportions, of the two fundamental compounds $Ca_4Al_2Si_2O_{8}$ (pure meionite) and $Na_4Al_3Si_3O_{24}Cl$ (pure marialite). The physical properties vary with the composition — the hardness from 5 to 6.5, the sp. gr. from 2.5 to 2.8, etc.

scap'o-lit'i-za'tion (skăp'ŏ-lĭt'ĭ-zā'shŭn; -ī-zā'shŭn), *n.* *Petrog.* The process or state of alteration by which minerals, esp. feldspar, are converted into scapolite.

scap'ose (skăp'ōs; skă-pōs'; *see* -OSE), *a.* [1st *scape* + *-ose*.] *Bot.* Scape-bearing; resembling, or consisting of, a scape.

scap'u-la (skăp'ŭ-lă), *n.*; *pl.* L. SCAPULÆ (-lē), E. SCAPULAS (-lăz). [L.] **1.** *Anat. & Zoöl.* The shoulder blade; the dorsal and in most mammals the principal, or sometimes the only, bone of the pectoral arch, or shoulder girdle. The human scapula is flat and triangular, situated in the upper lateral part of the back, and having at the outer angle a large shallow fossa (the **glenoid cavity**) for articulation with the head of the humerus. On its posterior surface, or dorsum, is a prominent, obliquely transverse ridge (the **spine**), ending in a process (the **acromion process**) which arches over the glenoid cavity and articulates with the clavicle, forming the point of the shoulder. The spine divides the dorsum into two fossæ (the **suprascapular** above, and the **infrascapular** below); the slightly concave anterior surface, or **venter**, forms one large fossa, the **subscapular**. A hooked process (the **coracoid process**), extending in front of the glenoid cavity, represents the **coracoid bone** of many vertebrates. In birds the scapula is long and narrow; in amphibians and some other animals its dorsal part may be an imperfectly ossified suprascapula. In teleost fishes both the hypercoracoid and supraclavicle have been regarded as representing, and called, the scapula.

2. *Zoöl.* **a** The tegula (appendage of the mesothorax) of a lepidopterous or hymenopterous insect. See TEGULA **a**. **b** A pleuron of the mesothorax of an insect, including the epimeron and episternum. **c** The trochanter of the fore leg of an insect. **d** A plate of the cup of a crinoid situated at the base of an arm. **e** The patagium (appendage of the prothorax) of a lepidopterous insect.

scap'u-lar (-lăr), *a.* Also **scap'u-la-ry** (-lă-rĭ). Of or pertaining to the shoulder, the scapula, or scapulars.

scapular arch, *Anat. & Zoöl.*, the pectoral arch. — **s. index,** *Anat.*, the ratio of the length of the scapula (taken equal to 100) to its breadth.

scap'u-lar (skăp'ŭ-lăr), *n.* [F. *scapulaire*, or LL. *scapulare*, *scapulare*, fr. L. *scapula* shoulder blade.] **1.** *R. C. Ch.* **a** A loose sleeveless vestment falling in front and behind, worn by certain religious orders and devout persons. **b** An article consisting of two small square pieces of cloth connected by cords, worn over the shoulders under the ordinary garb as an act of devotion.

F. *scholastique, scolastique.* See SCHOOL.] **1.** Pertaining to or suiting a scholar, a school, or schools; scholarlike; as, *scholastic* manners or pride; *scholastic* learning.

2. Of or pert. to the Schoolmen and divines of the Middle Ages; as, *scholastic* divinity, theology, or philosophy.

3. In the manner of the medieval Schoolmen; hence, characterized by excessive subtilty; pedantic; formal.

Syn. — See SCHOLARLY.

scho-las'tic, *n.* **1.** [*usually cap.*] A Christian philosopher of the Middle Ages; a Schoolman.

2. One who deals with philosophical or theological problems in the spirit of Scholasticism; depreciatively, a pedant; a formalist.

3. *R. C. Ch.* A member of a grade in the Society of Jesus. See JESUIT, 1.

4. A scholar or student.

scho-las'ti-cism (-tĭ-sĭz'm), *n.* **1.** [*usually cap.*] The methods and doctrines of the Christian philosophers of the Middle Ages. The sources of Scholasticism were the writings of the church fathers and those of Aristotle and his Arabian commentators: its main problem was the reconciliation of Christian faith with reason; and its method, stiff and formal, was characterized by excessive deference to authority and large reliance upon deduction. Scholastic philosophy is usually reckoned as beginning with Scotus Erigena (b. about 800 A. D.), who affirmed the essential identity of faith and reason and the parallelism of thought and being. The latter doctrine gave rise to the problem of universals (see UNIVERSAL), which formed the center of controversy during the whole of the first period of Scholasticism. The second period was inaugurated early in the 13th century, by the acquisition of a large part of the writings of Aristotle and the translation of Arabian works. In this period Scholastic philosophy reached its fullest development in the great synthetic works, or *Summæ,* of Alexander of Hales, Albertus Magnus, and Thomas Aquinas (see THOMISM), and the critical opposition of John Duns Scotus (see SCOTISM). The third period, from about 1300 to 1450, marks the decline and fall of Scholasticism, the energies of the time, especially in the higher educational institutions, being devoted to futile and quibbling debates to which are mainly due the later ill repute of Scholastic methods. Scholasticism did not, however, wholly cease, and in modern times it is being subjected to an energetic revival (see NEO-SCHOLASTICISM).

This doctrine of the continuity and independence of the natural with respect to the supernatural order of truth is the core of *Scholasticism.* It is by this that *Scholasticism* is distinguished from Greek philosophy, of which the chief defect, as well as the paramount merit, was its complete naturalness. *Wm. Turner*

2. A scholastic point of view.

scho'li-ast (skō'lĭ-ăst), *n.* [Gr. σχολιαστής, fr. σχόλιον scholium: cf. F. *scoliaste.* See SCHOLIUM.] A maker of scholia; commentator; annotator. — **scho'li-as'tic** (-ăs'tĭk), *a.*

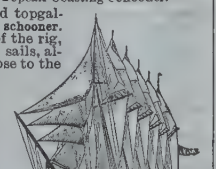
schoon'er (skōōn'ẽr), *n.* A large tall drinking glass for beer or ale. *U. S.*

schoon'er, *n.* [From dial. *scoon,* of Scand. orig. See the Note below.] *Naut.* A fore-and-aft rigged vessel, orig., and still typically, having two masts, with the smaller sail on the foremast and the mainmast stepped nearly amidships. Sometimes, though very rarely in America, it carries square topsails on one or both masts or even a forecourse. When carrying a square foopsail and topgallant sail it is called a **topsail schooner.** The characteristic feature of the rig, however, is its fore-and-aft sails, allowing the vessel to sail close to the wind. About 1840, longer vessels with three masts, fore-and-aft rigged, came into use, and since that time vessels with four and even seven masts so rigged have been built. Schooners with more than two masts are designated *three-masted schooners, four-masted schooners,* etc., or, rarely and not in the United States, *terns, quarts, quints,* etc. See *Illust.*

Topsail Coasting Schooner.



Six-masted Schooner.

☞ The first *schooner* is said to have been built in Gloucester, Massachusetts, about 1713, by a Captain Andrew Robinson. When the vessel was launched, a bystander cried out, "O, how she *scoons!*" Robinson replied, "A *scooner* let her be;" whence the name (see SCOON, to skip or skim). In the New England records the word appears to have been originally written *scooner.*

Schwen'de-ne'ri-an (shvĕn'dē-nē'rĭ-ăn), *a.* Pertaining to S. Schwendener (b. 1829), German botanist. — **Schwendenerian theory,** *Bot.,* the theory originally suggested by de Bary (1866), reasserted by Schwendener (1869), and ultimately established, that lichens are not distinct organisms, but are made up of a fungus and an alga growing in symbiotic relationship (see LICHEN, 2).

Sci'a-dop'i-tys (sī'ă-dŏp'ĭ-tĭs), *n.* [NL.; Gr. σκιάς, -άδος, shade + πίτυς pine tree.] *Bot.* A genus of pinaceous trees, consisting of *S. verticillata,* the umbrella pine, of Japan.

Sci-æn'i-dæ (sī-ĕn'ĭ-dē; sī-ē'nĭ-dē), *n. pl.* [NL.; L. *sciæna* a kind of fish (fr. Gr. σκίαινα) + *-idæ.*] *Zoöl.* A large, important, and widely distributed family of carnivorous acanthopterygian fishes comprising the meagre, squeteagues, kingfishes, drumfishes, etc. Nearly all are marine, and live along the sandy shores of warm temperate seas. In most the air bladder is large and complicated, and with it the fish produces a peculiar sound (see CROAKER). Many are large and valued as food. The type genus is **Sci-æ'na** (sī-ē'nă). — **sci-æ'nid** (-ē'nĭd), *n.* — **sci-æn'i-form** (-ĕn'ĭ-fôrm; -ē'nĭ-fôrm), *a.* — **sci-æ'noid** (-ē'noid), *a.* & *n.*

sci-am'a-chy (sī-ăm'ă-kĭ), *n.* [Gr. σκιαμαχία, σκιομαχία; σκιά a shadow + μάχη battle.] A fighting with a shadow; a mock contest; an imaginary or futile combat. *Cowley.*

sci-at'ic (sī-ăt'ĭk), *a.* [F. *sciatique,* LL. *sciaticus,* fr. L. *ischiadicus,* Gr. ἰσχιαδικός. See ISCHIADIC.] Of or pert. to the hip; in the region of, or affecting, the hip; ischial.
sciatic artery, *Anat.,* the larger of the two terminal branches of the anterior trunk of the internal iliac artery, distributed to the muscles at the back of the pelvis and thigh. — **s. nerve,** *Anat.,* either of two nerves arising from the sacral plexus. The great sciatic nerve passes out of the pelvis through the great sacrosciatic foramen and thence down the back of the thigh to about its lower third, where it divides into to the popliteal nerves. The lesser sciatic nerve leaves the pelvis with the great sciatic, and is distributed to the integument of the perineum and back of the thigh and leg. — **s. veins,** the veins accompanying the sciatic arteries.

sci-at'i-ca (-ĭ-kă), *n.* [NL.] *Med.* Neuralgia of the sciatic nerve, an affection characterized by paroxysmal attacks of pain along the course of the branches of the sciatic nerve. Popularly, also, any of various painful affections of the hip and adjoining parts.

scib'i-le (sĭb'ĭ-lē), *n.* [L. *scibilis* knowable.] *Philos.* An object of knowledge.

sci'ence (sī'ĕns), *n.* [F., fr. L. *scientia,* fr. *sciens, -entis,* p. pr. of *scire* to know. Cf. CONSCIENCE, CONSCIOUS, NICE.]
1. Knowledge; knowledge of principles or facts.
While beyond the region of knowledge the modern philosopher places the region of nescience, St. Thomas taught that where *science* ends faith begins. *Wm. Turner.*
2. Specif., accumulated and accepted knowledge which has been systematized and formulated with reference to the discovery of general truths or the operation of general laws; knowledge classified and made available in work, life, or the search for truth; comprehensive, profound, or philosophical knowledge.
All this new *science* that men lere [teach]. *Chaucer.*
Science is . . . a complement of cognitions, having, in point of form, the character of logical perfection, and in point of matter, the character of real truth. *Sir W. Hamilton.*
Science may be described as a classified index to the successive pages of sense impression, which enables us readily to find what we want, but it in no wise accounts for the peculiar contents of that strange book of life. *Karl Pearson.*
3. Esp., such knowledge when it relates to the physical world and its phenomena; — called also *natural science.*
Voltaire hardly left a single corner of the field entirely unexplored in *science,* poetry, history, philosophy. *J. Morley.*
4. Any branch or department of systematized knowledge considered as a distinct field of investigation or object of study; as, the *science* of astronomy or of mind.
Every *science,* as we read in Aristotle, assumes its subject matter, and does not give an account of it. *B. Bosanquet.*

5. Art or skill regarded as the result of knowledge of laws and principles; as, a player of unusual *science*. **6.** Trade; vocation. *Obs.*

Syn.— SCIENCE, ART are discriminated as in the quotations below. See KNOWLEDGE.

A science teaches us to know, and an *art* to do, and all the more perfect *sciences* lead to the creation of corresponding useful *arts*. Astronomy is the foundation of the *art* of navigation; . . . chemistry is the basis of many useful *arts*. *Jevons.*

Rhetoric, here called an *art*, is sometimes defined as a *science*. Both designations are true. . . . *Science* is systematized knowledge; if then the laws and principles of discourse are exhibited in an ordered and interrelated system, they appear in the character of a *science*. *Art* is knowledge made efficient by skill; if then rhetorical laws and principles are applied in the actual construction of discourse, they become the working rules of an *art*. *J. F. Genung.*

‖ **sci-en'ter** (sī-ĕn'tĕr), *adv.* [L.] *Law.* Knowingly; willfully. —*n.* *Law.* a Such knowledge as charges a man with the consequences of his acts (cf. screw gear. *Mach.* A screw wheel; also, a gear composed of, or having as a chief essential, a worm and worm wheel. — **screw gearing.**

screw'ing, *p. pr. & vb. n.* of SCREW. Hence: *p. a.* Exacting, oppressive, or extortionate; also, excessively economical: parsimonious.

screwing machine. *Mach.,* a screw machine.

screw machine. *Mach.* Any of various machines for making machine, wood, or other screws; specif., a capstan lathe with a hollow mandrel through which a bar can be fed to be cut into bolts, studs, and other screws, or any small repetition work, as handles, spindles, or the like.

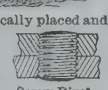
screw pile. A kind of pile, commonly made of cast iron and hollow, having a broad screwlike flange of usually from one to two turns.

screw pine. Any monocotyledonous plant of the genus *Pandanus*, esp. *P. tectorius*, the textile screw pine of Polynesia, and *P. utilis* and *P. veitchii*, common in cultivation. They have spirally arranged leaves and aërial roots. See PANDANUS.

Screw Pine.

screw plate. *Mech.* **a** A screw stock. *Chiefly U. S.* **b** A hardened steel plate with a series of threaded holes, slit longitudinally on opposite sides, and graded in size, for cutting small external screw threads.

screw propeller. A device consisting of a central hub with 2, 3, or 4 similar radiating blades symmetrically placed and twisted so that each forms part of a helical surface (like that of a screw thread) or having a shape approximating this, used to propel steamships, motor-boats, airships, etc.



Screw Rivet.

screw rivet. A short bolt screwed throughout its entire length and slightly riveted over on the ends when in place.

screw stock. *Mech.* **a** A die-stock. See STOCK, *n.* **b** = SCREW PLATE **b**.

screw tree. Any sterculiaceous plant of the genus *Helicteres;* — in allusion to the spirally twisted capsules.

screw wheel. A gear wheel with teeth intersecting the prism surface in helical lines and thus being parts of the threads of a many-threaded screw.

Screw Wheel.

screw worm. The larva of a fly (*Lucilia macellaria*), allied to the blowflies, which occurs in the warmer parts of North and South America and sometimes lays its eggs in sores or wounds or in the nostrils of animals, including man. The larvæ, which are armed with rings of small spines, bore into the flesh, causing serious and often fatal results.

screw'y (skrō'ĭ), *a.* **1.** Resembling a screw or its action. **2.** Inclined to oppress; oppressive; also, niggardly; mean. **3.** Intoxicated. *Slang.* **4.** Useless; worn out, as a horse. *Colloq.*

scrib'al (skrīb'ăl), *a.* **1.** Of or pert. to a scribe, or clerk. **2.** Of or pertaining to a Jewish scribe or scribes.

scrib'ble (skrĭb'l), *v. t.;* SCRIB'BLED (-ld); SCRIB'BLING (-lĭng). [Cf. Sw. *skrubbla* to card wool.] *Woolen Manuf., etc.* To card coarsely; to perform the preliminary operation of tearing apart (the more or less felted fibers) so as to mix them thoroughly, but without attempting to lay the fibers in parallel lines as in carding proper.

Harbor Seal (*Phoca vitulina*). ($\frac{1}{30}$)

Dan. *sæl*, Sw. *själ*, Icel. *selr.*] Any marine aquatic carnivorous mammal of the group Pinnipedia and family Phocidæ or Otariidæ, including, respectively, the true seals and the eared seals; any pinniped except the walrus. They mostly inhabit seacoasts and floating ice of the colder regions, but a few occur in warm regions. They feed on fish and marine animals, and have webbed flipperlike limbs with which they swim and dive well, but they crawl out on land more or less and always have their young there. In the true seals the hind limbs are partly fused with the tail and of little use except for swimming, external ears are not present, and the nostrils are somewhat dorsal. The eared seals (including sea lions, fur seals, etc.) are less modified from land animals (see EARED SEAL for characters). Seals are hunted for fur, hides, and oil, and, as they are often highly gregarious, many species have been nearly exterminated. Hair seals, so called in distinction from fur seals, have the hair short, coarse, and without soft under fur. See FUR SEAL, SEA LION, SEA ELEPHANT.

seal, *n.* [ME. *seel*, OF. *seel*, F. *sceau*, fr. L. *sigillum* a little figure or image, a seal, dim. of *signum* a mark, sign, figure, or image. See SIGN, *n.*; cf. SCARLET, SIGIL.] **1.** An impression made on wax, wafer, or some other tenacious substance capable of being impressed; also, the piece of wax, wafer, or other substance bearing the impression. This is the traditional common-law definition, and is in some jurisdictions construed to include an impression made in the substance of the paper or parchment of a document. Originally, in English law, seals were used in lieu of signatures to authenticate documents, being annexed directly or by ribbons, cords, strips of parchment, or the like; later, the seal was made by judicial decision to import conclusively a consideration for the promise or agreement made under seal (cf. CONTRACT, 1, CONSIDERATION, 7, DEED, 4). By statute in some of the United States the distinction between sealed and unsealed instruments has been abolished. **2.** *Law.* Any impression, device, sign, or mark given by statute law the effect of a common-law seal, as the word "seal" or the letters "L. S." written or printed, or a scroll made with the pen, or any device made as a seal. **3.** The engraved or inscribed stamp used for making an impression in wax or other tenacious substance capable of being impressed for use upon documents. **4.** That which confirms, ratifies, or makes stable; ratification; confirmation; pledge; guaranty; assurance. **5.** A sealed instrument, as a writ or warrant. *Obs.* **6.** The office of an official sealer or authenticator. *Obs.* **7.** That which seals, firmly closes, or secures, lit. or fig.; security; esp., the wax or wafer placed on a letter, envelope, etc.; also, a fastening, as on a door, for security.

Syn. — Hidden, concealed, disguised, unknown, private, privy; insidious, stealthy, furtive, sly, fraudulent. — SECRET, COVERT, CLANDESTINE, SURREPTITIOUS, UNDERHAND. SECRET is the general term for that which is hidden or concealed; that is COVERT which is not open or avowed; as, "The . . . virtues are the hidden beauties of a soul, the *secret* graces which cannot be discovered by a mortal eye" (*Spectator*); "She seized a lamp . . . and hurried towards the *secret* passage" (*Walpole*); "a *covert* glance at her face, as he walked beside her" (*Dickens*); "a mischievous child, with an eye on the face of a *covertly* watching elder" (*H. James*); "How was she, who was as innocent as a child, to know what was the meaning of the *covert* addresses of a villain?" (*Thackeray*). That is CLANDESTINE which is secretly conducted, usually with evil intent; SURREPTITIOUS emphasizes the idea of stealth or craft, an implication which is heightened in UNDERHAND; as, "the *clandestine*, insidious, treacherous admirer of Maria Bertram" (*Jane Austen*); a *clandestine* marriage; "There he kept his *surreptitious* quids of tobacco, his pipe, and his small hoards" (*Mary Wilkins*); "Over the paling of the garden we might obtain an oblique and *surreptitious* view" (*H. James*); "He had suspected his agent of some *underhand* dealings" (*Jane Austen*); "I say all this to them as to you. . . . I will have nothing *underhand*" (*Byron*). See STEALTHY, LATENT, MYSTERIOUS, SIMULATION.

See sow to scatter seed; cf. COLZA.] **1.** a *Bot.* A fertilized and ripened ovule. It is primarily the embryo sporophyte in a resting stage, which may develop by germination. Most seeds have a single integument (*testa*), some two (*testa* and *endopleura*), derived from the outer coating of the ovule, thus being morphologically a remnant of the megasporangium. The embryo is usually well developed when the seed ripens. It is often surrounded by a nutritive tissue (*endosperm*) representing the gametophyte of the parent plant. Sometimes part of the nucellus may persist as *perisperm*. The seed may also develop subsidiary appendages (*aril*, *arillode*, *caruncle*, etc.). The position and mode of attachment of the seed in the fruit are often of classificatory importance (see ANATROPOUS, ORTHOTROPOUS, CAMPYLOTROPOUS). The development of the megaspores into seed structures characterizes the highest plants, which are consequently known as the spermatophyta. seize (sēz), *v. t.* ; SEIZED (sēzd) ; SEIZ'ING (sēz'ĭng). [ME. *seisen, saisen*, OF. *seisir, saisir*, F. *saisir*, LL. *sacire ;* prob. of Teutonic origin.] **1.** *Law.* Orig., to put in possession ; later, to put into seizin (of) ; — usually with *of* and in the passive ; as, A B was *seized* and possessed of the manor of Dale. In this sense **seise** is the commoner spelling.
Whom age might see *seized* of what youth made prize. *Chapman.*
2. *Law.* To take possession of, or appropriate, in order to subject to the force or operation of a warrant, order of court, or other legal process ; — said of an officer of law.
3. To take possession of by force ; as, to *seize* the throne.
4. To lay hold of suddenly or forcibly ; to take hold of ; to reach and grasp ; to clutch ; as, to *seize* one's arm.
5. To fasten ; to fix. *Obs.* *Spenser.*
6. To grasp with the mind ; to comprehend fully and distinctly ; as, to *seize* an idea.
7. *Naut.* To bind or fasten together with a lashing of small stuff, as yarn or marline ; as, to *seize* ropes.
Syn. — Catch, snatch, apprehend, arrest, take, capture.

seize, *v. i.* **1.** To take or lay hold, or take possession, suddenly or forcibly ; to grasp ; clutch ; — with *on* or *upon.*
2. *Mech.* To cohere or stick fast to a relatively moving part, as a bearing, a gas-engine piston, a slide valve, etc., through excessive pressure, temperature, or friction.

sei'zin, *or, more commonly,* **sel'sin** (sē'zĭn), *n.* [F. *saisine.* See SEIZE.] *Law.* **1.** Orig., in early English law, possession, whether of land or chattels ; possession with quiet enjoyment ; later, that possession of, or status with relation to, land that arose from the completion of feudal investiture by livery of seizin. Hence, in the later common law, possession of a freehold estate in land by one having title thereto, this being **seizin in deed** when consisting in actual possession, and **seizin in law** when consisting in a mere right of present possession. Now, where delivery of a deed is equivalent to livery of seizin, the term *seizin* is often construed in some jurisdictions as equivalent to actual possession, in others as equivalent to ownership.
2. The thing possessed ; property. *Obs.*

sel' d'or' (sĕl' dôr'). [F., salt of gold.] *Photog.* A white crystalline salt, apparently sodium aurothiosulphate, $Na_3AuS_3O_3{\cdot}2H_2O$, made by treating gold chloride with sodium thiosulphate in solution. It was used in the daguerreotype process, and is now used in toning certain prints.

se-lect' (sē-lĕkt'), *a.* [L. *selectus*, p. pr. of *seligere* to select ; *se-* aside + *legere* to gather. See LEGEND.] **1.** Taken from a number of the same or an analogous kind by preference ; hence, of special value or excellence ; selected ; choice ; exclusive ; as, *select* poems ; a *select* club.

A few *select* spirits had separated from the crowd. *Macaulay*

2. Characterized by fastidiousness or special care in selecting ; nice in choosing ; as, to be *select* in making friends.

Syn. — SELECT, ELECT, EXCLUSIVE. That is SELECT which is the result of discriminating choice ; ELECT often implies admission to some select or inner circle ; EXCLUSIVE suggests the fastidiousness or (often) snobbishness of a clique or coterie ; as, a *select* audience ; "that delicious phantom of being an *elect* spirit . . . unlike the crowd" (*Kingsley*) ; "the *exclusive* in fashionable life" (*Emerson*).

select committee, *Eng. Parliamentary Practice*, a committee appointed to acquire information with a view to legislation and to examine into the constitution and management of an administrative department. Select committees have members from both parties. — **a. life,** *Life Insurance*, a life, or risk (which see), secured by selection by the company, and therefore of less than the normal mortality.

se-lect', *v. t. ;* SE-LECT'ED ; SE-LECT'ING. **1.** To take by preference from among others ; to pick out ; to cull ; as, to *select* the best books for reading.
2. *Australian Land Law.* To take up crown land under the Land Acts. Formerly the term *free-select* (and hence *free-selection*, *free-selector*) was usual, probably orig. in allusion to the opening for selection by Sir John Robertson's Land Act (1861) of large areas previously withheld.

Syn. — See CHOOSE.

se-lect'ed (sē-lĕk'tĕd), *p. a.* **1.** Select ; choice.
2. Specially devoted. *Obs.*

se-lec'tion (sē-lĕk'shŭn), *n.* [L. *selectio* : cf. F. *sélection*.] **1.** Act of selecting, or state of being selected.
2. That which is selected ; a collection of things chosen ; as, a choice *selection* of books.
3. *Australian Land Law.* Act of selecting land (see SELECT, *v. t.*, 2) ; also, a piece of land thus taken up.
4. *Biol.* Specif., any process, natural (see NATURAL SELECTION) or artificial, which results or tends to result in preventing certain individuals or groups of organisms from surviving and propagating, and in allowing others to do so. See NATURAL SELECTION, SEXUAL SELECTION, DARWINISM.
5. *Life Insurance.* The action by which the lives insured by a company are secured or retained, called **selection by the company** when it is the action of the company in aiming to secure healthy lives, and **selection against the company** when it consists in the action of policyholders in withdrawing or allowing their policies to lapse.

selection forest. *Forestry.* A forest in which trees of all age classes are represented.

se-lec'tion-ist, *n.* *Biol.* One who considers natural selection as an especially important factor in evolution.

se-lec'tive (sē-lĕk'tĭv), *a.* **1.** Of, pert. to, or characterized by, selection ; selecting or tending to select ; as, *selective* action or breeding ; a *selective* screen, stain, or mind.

This *selective* providence of the Almighty *Ep. Hall.*

2. *Wireless Teleg.* Designating a system by which two or more messages can be sent or received simultaneously without interference.

selective absorption, *Physics*, absorption in which waves of any kind, as of light, pass through substances not equally pervious to all wave lengths. — **s. radiation,** radiation in which waves of certain lengths are intense compared with the other waves. — **s. reflection,** reflection in which waves of certain lengths are reflected with little loss of intensity compared with the loss in case of other waves. — **s. transmission,** *Mach.*, a transmission for automobiles, etc., by which the gear can be changed directly from one speed to another by a single lever.

se-lect'man (sē-lĕkt'măn), *n. ; pl.* **-MEN** (-mĕn). A person chosen to exercise special powers in a system of government ; esp., one of a board of officers chosen annually in towns in the New England States, except Rhode Island, to transact the general public business of the town. The number is usually from three to seven or nine in each town. The office seems to have been derived from that of the English select vestryman. By statute in some of these States the term is made to include the mayor and aldermen of a city.

se-lec'tor (sē-lĕk'tẽr), *n.* [L.] One that selects. Specif. : **a** *Australian Land Law.* A person who selects land ; less exactly, a small farmer. See SELECT, *v. t.*, 2. Cf. SQUATTER, 3. **b** *Railroading.* An apparatus for operating either or any of two or more signals by a single lever, devised so as automatically to connect the particular signal controlling the route for which a switch has been set. **c** A thermomagnetic device for determining temperatures for rolling rails. **d** *Copper Smelting.* A kind of converter with horizontal tuyères, to produce bottoms (see BOTTOM, *n.*, 11) and a purified copper in one operation.

Se-le'ne, Se-le'na (sē-lē'nē ; -nă), *n.* [Gr. Σελήνη, fr. σελήνη moon.] *Gr. Relig.* The goddess of the moon, merged in Artemis and Hecate. See ENDYMION.

se-len'ic (-lĕn'ĭk), *a.* *Chem.* Of, pert. to, or containing, selenium ; specif., designating those compounds in which the element has a higher valence as contrasted with *selenious* compounds. — **selenic acid,** an acid, H_2SeO_4, resembling sulphuric acid but less stable, got by oxidation of selenium. By reduction it yields selenious acid.

se-le'ni-o- (sē-lē'nĭ-ō-). *Chem.* Combining form (also used adjectively) denoting the *presence of selenium* or *its compounds* ; as, *selenio*-phosphate, a phosphate having selenium in place of all, or a part, of the oxygen.

se-le'ni-ous (-ŭs), *a.* *Chem.* Of, pert. to, or containing, selenium ; specif., designating those compounds in which the element has a lower valence as contrasted with *selenic* compounds. — **selenious acid,** a white crystalline poisonous acid, H_2SeO_3, got by oxidation of selenium and easily yielding the element by reduction.

Se-le'ni-po'di-um (sē-lē'nĭ-pē'dĭ-ŭm), *n.* [NL. ; Gr. Σελήνη Selene + (prob.) L. *pes*, *pedis*, foot.] *Bot.* A genus of South American orchids closely related to *Cypripedium*, containing only two species. The pods are sometimes used as a substitute for vanilla.

sel'e-nite (sĕl'ē-nīt), *n.* [L. *selenites*, Gr. σεληνίτης (sc. λίθος), fr. σελήνη the moon. So called from a fancied resemblance to the moon.] **1.** *Chem.* A salt of selenious acid.
2. *Min.* A variety of gypsum, occurring in transparent crystals or crystalline masses.

— **sel'e-nit'ic** (-nĭt'ĭk), **-nit'i-cal** (-ĭ-kăl), *a.*

se-le'ni-um (sē-lē'nĭ-ŭm), *n.* [NL., fr. Gr. σελήνη the moon. So called because of its chemical analogy to *tellurium* (fr. L. *tellus* the earth), being, as it were, a companion to it.] *Chem.* A nonmetallic element, resembling sulphur and tellurium chemically, found to a small extent in native sulphur and (combined) in native sulphides, also in a few selenides, as clausthalite. Symbol, *Se* ; at. wt., 79.2. It was discovered in 1817 by Berzelius in the deposit from sulphuric acid chambers, which is still its commercial source. Like sulphur, selenium occurs in several allotropic forms, being obtained as a brick-red or dark red amorphous powder (sp. gr., 4.26), as a brownish black, glassy mass (sp. gr., 4.28), as red monoclinic crystals (sp. gr., 4.47), or as a bluish gray, metal-like, crystalline mass (sp. gr., 4.8). Metallic selenium conducts electricity, and its resistance is decreased by exposure to light. Selenium burns in air with a bluish flame and a disagreeable odor.

se-le'no-dont (sē-lē'nō-dŏnt), *a.* [Gr. σελήνη moon + *-odont.*] *Zoöl.* Having, or designating, molar teeth with crescentic ridges on the crown, as in the majority of artiodactyls. — *n.* A mammal with selenodont teeth.

se-le'no-graph (-grăf), *n.* A picture or delineation of the moon's surface, or of any part of it.

sel'e-nog'ra-pher (sĕl'ē-nŏg'rä-fẽr), *n.* A specialist in selenography.

se-le'no-graph'ic (sē-lē'nō-grăf'ĭk) } *a.* [Cf. F. *sélénose-le'no-graph'i-cal* (-grăf'ĭ-kăl) } *graphique.*] Of or pert. to selenography. — **selenographic chart,** a map representing the surface of the moon.
— **se-le'no-graph'i-cal-ly,** *adv.*

sel'e-nog'ra-phist (sĕl'ē-nŏg'rä-fĭst), *n.* A selenographer.

sel'e-nog'ra-phy (-fĭ), *n.* [Gr. σελήνη the moon + *-graphy.*] The science of the physical features of the moon ; the physical geography of the moon.

sel'e-nol'o-gy (-jĭ), *n.* [Gr. σελήνη the moon + *-logy.*] That branch of astronomy which treats of the moon ; loosely, selenography. — **se-le'no-log'i-cal** (sē-lē'nō-lŏj'ĭ-kăl), *a.* — **sel'e-nol'o-gist** (-nŏl'ō-jĭst), *n.*

Se-leu'ci-an (sē-lū'shĭ-ăn ; -sĭ-ăn), *n.* *Eccl. Hist.* A follower of Seleucus, a Galatian of the 3d century said to have taught heresies as to the reality of Christ's body, divine agency in creation, and use of water in baptism.

It is divided into two parts, the lower called **sem'i-spi-na'lis dor'si** (dôr'sī), the upper **sem'i-spi-na'lis cer'vi-cis** (sĕr'vĭ-sĭs).

Sem'ite (sĕm'ĭt), *n.* **1.** One of the descendants of Shem.

2. A member of a Caucasian race now chiefly represented by the Jews and Arabs, but in ancient times including also the Babylonians, Assyrians, Aramæans, Phœnicians, and various other peoples of southwestern Asia. Cf. SEMITIC.

The term *Semite* is used both in an ethnological and in a linguistic sense. As originally employed by J. G. Eichhorn at the close of the 18th century, it embraced the peoples grouped in Gen. x. as the "sons of Shem." Since, however, it has been ascertained that the peoples thus grouped do not belong to one or even to allied races, the ethnological application of the term race has been modified to designate a race distinguished by the following features : dolichocephalic skulls ; curly and abundant hair ; slightly wavy or straight strong beard, the color predominantly black ; prominent nose, straight or aquiline ; oval face. *Dict. of Bible (Hastings).*

Sem-it'ic (sĕ-mĭt'ĭk), *a.* Of or pert. to, or characteristic of, the Semites or the family of languages spoken by them.

Semitic languages, a family of inflectional languages, possessing records of extreme antiquity, now spoken mainly in Arabia, Asiatic Turkey, and North Africa. With exception of Egyptian (and the hypothetical Akkadian), the Semitic languages have the longest recorded history (cf. BABYLONIAN, 2), and are also the least diversified of the great linguistic families, the various groups presenting a close and compact relationship. They are not known to be related to any other family, but connection with the Hamitic is not impossible. Their striking traits are: triliteral stems; constant character of the consonants in these stems, inflections being determined by vowel changes; agreement of noun and verb formation; restriction of verbal tense to completed and incompleted action. (See INFLECTIONAL LANGUAGES.) These languages are supposed to have been the first to evolve a true alphabet (see ALPHABET, 1; cf. CUNEIFORM, 1). The languages may be grouped as follows:

TABLE OF SEMITIC LANGUAGES.

sen-sa'tion (sĕn-sā'shŭn), *n.* [F. *sensation*, or LL. *sensatio*. See SENSATE, *a.*] **1.** A feeling or state of consciousness produced either by an external object (stimulus), or by some change in the internal state of the body; in a general sense, that mode of mental functioning referred to some immediate stimulation of the bodily organism; the power or process of receiving sense impressions. *Sensation* is mere feeling, without the idea of an object, and by some psychologists is held to be only an abstraction from perceptual experience, at least in adult life; while the *perception* is the mind's apprehension of some external object as occasioning the sensory feeling. If I have a simple smell apart from all recognition or association, I have a *sensation*; if I refer that smell to the external object, say, a rose, which occasioned it, I have a *perception*.

Perception is only a special kind of knowledge, and *sensation* a special kind of feeling. . . Knowledge and feeling, perception and *sensation*, though always coexistent, are always in the inverse ratio of each other. *Sir W. Hamilton.*

Aristotle . . . defines *sensation* as a congenital critical power. *Thos. Case* (*Encyc. Brit.*).

St. Thomas does not discuss in detail the nature of *sensation*. . . . *Sensation*, he teaches, is the act by which the object produces a modification in the animated organism. *Wm. Turner.*

Perception always involves *sensation* as a portion of itself; and *sensation* in turn never takes place in adult life without perception also being there. They are therefore names for different cognitive functions, not for different sorts of mental facts. *Wm. James.*

2. Any feeling; esp., a more or less indefinite bodily feeling; as, a *sensation* of buoyancy.

3. A state of excited interest or feeling, or its cause; as, the crime was, and caused, a great *sensation*.

Syn. — See SENSE.

sen-sa'tion-al (sĕn-sā'shŭn-ăl), *a.* **1.** Of or pert. to sensation; having, or characterized by, sensation; involving or inducing sensation; as, *sensational* states of mind.

2. *Philos.* Of or pertaining to sensationalism.

3. Suited or intended to excite temporarily great interest or emotion; melodramatic; emotional; as, *sensational* plays, novels, preaching; a *sensational* report.

sen-sa'tion-al-ism (-ĭz'm), *n.* **1.** *Philos.* The doctrine that all our knowledge originates in sensation or sense perceptions, or, in a narrower meaning, that all knowledge is made up of sense elements. *Sensationalism* is traced back to the Sophists and Cyrenaics, while it also found expression both with the Epicureans and the Stoics. Though in these latter they did not restrict knowledge to sensation except in origin, held that the mind is at first a *tabula rasa* (blank tablet) on which the outer world gradually imprints its image by means of sense impressions. This is substantially the view of Hobbes, the founder of modern *sensationalism*, and of Locke, who, however, placed considerable emphasis upon ideas which are the result of reflection upon ideas of sense, and so only indirectly derived from sensation. Condillac, the most characteristic modern sensationalist, considers all consciousness transformed sensation.

2. *Ethics.* The doctrine that feeling is the sole criterion of good; sensualism.

3. The practice or methods of sensational writing or speaking; as, the *sensationalism* of a certain novel.

sen-sa'tion-al-ist, *n.* **1.** *Philos.* An advocate of, or believer in, sensationalism.

2. One who practices sensational writing or speaking.

sen-sa'tion-al-is'tic (-ĭs'tĭk), *a.* Of or pertaining to sensationalists or sensationalism.

sense (sĕns), *n.* [L. *sensus*, fr. *sentire*, *sensum*, to perceive, to feel, prob. fr. the same root as E. *send*; cf. OHG. *sin* sense, mind, *sinnan* to go, to journey, G. *sinnen* to meditate, to think: cf. F. *sens*. For the change of meaning cf. SEE, *v. t.* See SEND; cf. ASSENT, CONSENT, SCENT, *v. t.*, SENTENCE, SENTIENT.] **1.** Meaning; import; signification; as, the true *sense* of words; the *sense* of a remark.

So they read in the book . . . and gave the *sense*. *Neh.* viii. 8.

There is indeed a *sense* in which life has no need of the philosopher. *Josiah Royce.*

2. Mind; sentience; consciousness; intelligence.

As if the steel had *sense*. *Spenser.*

3. Perception through the intellect; apprehension; recognition; understanding; discernment; appreciation.

This Basilius, having the quick *sense* of a lover. *Sir P. Sidney.*

4. Sound perception and reasoning; correct judgment; good mental capacity; also, that which is sound, or reasonable; rational meaning. "He speaks *sense*." *Shak.*

Good *sense*, which only is the gift of Heaven. *Pope.*

5. Moral perception or appreciation

Some are so hardened in wickedness as to have no *sense* of the most friendly offices. *L'Estrange.*

6. The faculty, possessed by animals, of receiving mental impressions through the action of certain organs (sensory or sense organs) of the body, or of perceiving changes in the condition of the body; also, any special faculty of sensation. Aristotle distinguished the *five senses* of sight, hearing, smell, taste, and touch. Other senses have been or are added, as the muscular *sense*, temperature *sense*, sexual *sense*, etc. Various occult and spiritual *senses* have also been postulated, as the "*sense* of the heart" of Jonathan Edwards, immediately perceiving spiritual worth or truth. Imagination and memory have been distinguished as *internal senses* from the perceptive or *external senses*. *Sense discriminations* are distinguished by psychologists as qualitative, intensive, extensive, and temporal, while feeling tone attaches to any sensation as its affective element.

He really accepted, like Kant, the hypothesis of a *sense* of sensations which led to the Kantian conclusion that the nature we know in time and space is mere sensible appearances in us. *Thos. Case* (*Encyc. Brit.*).

7. Sense perception; sensation; sensibility; feeling.

The *sense* and the affects of any one part of the body instantly make a transcursion through the whole. *Bacon.*

The very character and essence of *sense* is isolation, and therefore in apprehending variety, series. *B. Bosanquet.*

8. That which is felt or is held as a sentiment, view, or opinion; judgment; opinion; as, the *sense* of the meeting.

9. *Geom.* One of two opposite directions in which a line, surface, or volume, may be supposed to be described by the motion of a point, line, or surface, or to be reckoned; — opposite senses being denoted by opposite signs, + and —.

10. Hence, direction; trend; course.

Equilibrium is then dynamic, not static, the condition which must be fulfilled being that the same number of transformations must take place in one *sense*, in a given time, as take place in the opposite *sense*. *B. C. Jones.*

Syn. — **Sense, sensation, sensibility, sensitiveness, susceptibility** are here compared in their nontechnical uses; for technical senses see defs. SENSE, as here discriminated (see REASON, MEANING), denotes a feeling or consciousness which is vaguer or less corporeal or objective than that denoted by SENSATION; as, "He would not observe her, but he had a *sense* of an elastic walk" (*G. Eliot*); "a general *sensation* of drowsy warmth and vast light and exotic vegetation" (*Lafcadio Hearn*); "a *sense* sublime of something far more deeply interfused" (*Wordsworth*); "*sensations* sweet, felt in the blood, and felt along the heart" (*id.*). SENSIBILITY is capacity, esp. keen or delicate, of emotion or feeling; SENSITIVENESS is acute, sometimes morbid, sensibility; as, "His *sensibility* and nervous exaltation gave [his poetry] the gift of rendering with wonderful felicity the magical charm of nature" (*M. Arnold*); "the nerveless sentimentalist and dreamer, who spends his life in a weltering sea of *sensibility*" (*W. James*); "Women [have] greater irritability (or, as it is perhaps better called, affectability), often deeper *sensability*" (*Havelock Ellis*); "She had . . . wounded the *sensibilities* of the footmen" (*Thackeray*); "Tact, after all, is only a *sensitiveness* of nerve" (*Lowell*); "Propose to yourself the necessity . . . of not being unduly affected or hurt at what they say or do. *Sensitiveness* is a weakness most paralyzing . . . to the mind" (*Jowett*); "that proud, narrow *sensitiveness* . . . which quivers threadlike in small currents of self-preoccupation" (*G. Eliot*). SUSCEPTIBILITY, though often equivalent to *sensibility*, commonly emphasizes more strongly quickness of response to impressions from without; as, "He would not allow her to read to him, . . . alleging nervous *susceptibility* to sounds and movements" (*G. Eliot*); "The poetic faculty always has for its basis a peculiar temperament, an extraordinary delicacy of organization, and *susceptibility* to impressions" (*M. Arnold*). See FEELING, SENSIBLE, INSENSIBLE, REASON.

sense (sĕns), *v. t.*; SENSED (sĕnst); SENS'ING. **1.** To perceive by the senses. *Obs.* *Glanvill.*

2. To give the sense or meaning of; to expound. *Obs.*

3. To get the meaning of; to perceive; grasp; comprehend; understand; realize. *Colloq., U. S.*

sense impression. *Psychol.* A psychical event due to the excitation of an organ of sense or of a sense center; a sensation; also, the physiological effect of sense excitation on the nervous system, esp. on the brain.

sense'less, *a.* Destitute of, deficient in, or contrary to, sense. Specif.: **a** Without sensibility or feeling; insensible; unconscious. **b** Deficient in knowledge, appreciation, or reasoning power; stupid; foolish. **c** Lacking good sense; unwise; unreasonable; nonsensical. — **sense'less-ly,** *adv.* — **sense'less-ness,** *n.*

sense organ. *Physiol. & Psychol.* An organ whose function is to respond to stimulation of a particular kind by occasioning a special kind of a sensation, as the eye or ear.

sense perception. Perception by the senses, as distinguished from intellectual perception.

Sense perception is the crudest and least conscious form of knowing . . . that form which knows least about itself and understands the least about its presuppositions. *W. T. Harris.*

It is the character and quality of being directly in contact with *sense perception*, not any fixed datum of content, that forms the constantly shifting center of the individual's real world, and grades from that center. *B. Bosanquet.*

sen'si-bil'i-ty (sĕn'sĭ-bĭl'ĭ-tĭ), *n.*; *pl.* **-TIES** (-tĭz). [Cf. F. *sensibilité*, LL. *sensibilitas*.] **1.** Sense perception; sense image. *Obs.* *Chaucer.*

2. Mental receptivity; ready discernment.

Of truth have they scant *sensibility*. *Hoccleve.*

3. Capacity of emotion or feeling, as distinguished from the intellect and the will; peculiar susceptibility or manifestation of impression, pleasurable or painful; delicacy of feeling; quick emotion or sympathy; as, *sensibility* to pleasure or pain; *sensibility* to shame or praise; exquisite *sensibility*; — often in *pl.* "*Sensibilities* so fine!" *Cowper.*

My father, to who had attended Dr. Hutchinson's lectures, never spoke of them without much *sensibility*. *J. Martineau.*

4. State or quality of being sensible, or capable of sensation; capacity to feel or perceive.

It is true, no doubt, that what the psychologist calls *sensibility* has as its invariable concomitant what physiologists call *sensibility*, or what the more careful of them call irritability; and, true again, that this irritability is invariably preceded by a physical process called stimulation. *James Ward* (*Encyc. Brit.*).

5. Experience of sensations; acute feeling.

This adds greatly to my *sensibility*. *Burke.*

6. That quality of an instrument which makes it indicate very slight changes of condition; delicacy.

7. *Photog.* Sensitiveness.

Syn. — Taste, susceptibility, feeling. See SENSE, JUDGMENT.

sen'si-ble (sĕn'sĭ-b'l), *a.* [F., fr. L. *sensibilis*, fr. *sentire*, *sensum*, to feel. See SENSE, *n.*] **1.** Capable of being perceived by the senses; apprehensible through the bodily organs; hence, also, perceptible to the mind; making an impression upon the sense, reason, or understanding.

The disgrace was more *sensible* than the pain. *Sir W. Temple.*

There is not the slightest reason for believing that what we call the *sensible* qualities of the object are a type of anything inherent in itself, or bear any affinity to its own nature. *J. S. Mill.*

2. Capable of receiving impressions from external objects by means of the proper organs; liable to be affected physically or mentally; impressible.

Would your cambric were *sensible* as your finger. *Shak.*

3. Hence: Liable to impression from without; easily affected; having or exhibiting nice perception or acute feeling; sensitive.

They are always *sensible* to kindness. *North Amer. Rev.*

4. Also, readily moved or affected by natural agents; delicate; as, a *sensible* thermometer, photographic plate, etc. "With affection wondrous *sensible*." *Shak.*

5. Perceiving, or having perception, either by the senses or the mind; cognizant; aware; perceiving so clearly as to be convinced; satisfied; persuaded; as, *sensible* of being cold or of having made a mistake.

Sep'tu-a-gint (sĕp'tų̄-ȧ-jĭnt), *n.* [From L. *septuaginta* seventy.] The important Greek version of the Old Testament still in use in the Eastern Church. See 1st CANON, 4.
The Septuagint is so called from a discarded tradition, apparently referring originally only to the Pentateuch, that it was the work of seventy (or rather seventy-two) inspired writers, translating independently or in pairs at the behest of Ptolemy II., as suggested by Demetrius Phalareus (about 285 B. C.), but miraculously attaining identical results. It probably was begun about that time, and was completed about the beginning of the Christian Era. It differs from the Masoretic text chiefly in Samuel, Kings, Proverbs, and in Jeremiah, where it lacks about 2,700 words present in the Hebrew. The Septuagint is the version cited by Philo, Josephus, and in the New Testament.
Septuagint chronology. The chronology founded upon the dates of the Septuagint, which makes about 1,500 years more from the creation to Abraham than the Hebrew Bible, and about 1,150 more than the Samaritan Pentateuch.

4. An officer in a police force, in the United States ranking next below captain (sometimes lieutenant), in England next below inspector.

5. Short for SERGEANT FISH.

sergeant, *or* **serjeant, at arms. a** *Eng. Feudal Law.* A tenant holding by the sergeanty of service as an armed personal attendant for protection of the lord and enforcement of his commands; such an attendant upon the king, or on the king's lord high steward in court, to arrest traitors and other offenders. The title is preserved for the two officers who, nominally by allowance of the sovereign, attend on the houses of Parliament (one for each house) to execute their commands, and for the officer similarly attending on the Court of Chancery. Hence: **b** An officer of any legislative body, or of a deliberative or judicial assembly, who attends upon it to execute its commands in preserving order, arresting offenders, or the like. — **s. at law,** *Eng. Law,* a barrister of the highest rank, answering to the *doctor* of the Civil law, outranking king's counsel socially, but in professional rank inferior to them. Serjeants had for centuries the exclusive right to be heard in the Court of Common Pleas until that privilege was taken away, chiefly by 9 & 10 Vict. c. 54 (1846). Until the Judicature Acts of 1873, they alone could be justices of the Supreme Court.

Sergeant, *or* **Serjeant, Baker.** A brightly colored fish (*Aulopus purpurissatus*) allied to the Myctophidæ of the Australian coasts. It becomes about two feet long.

Sergeant, *or* **serjeant, fish. a** A striped, pelagic, somewhat mackerel-like fish (*Rachycentron canadum*), of the coasts of America and the East Indies. **b** A robalo.

ser'geant-ry, ser'jeant-ry (sär'jĕnt-rĭ), *n.* [OF. *sergenterie, serjanterie.* See SERGEANT.] Sergeanty.

ser'geant-y, ser'jeant-y (-ĭ), *n.* [OF. *sergentie, serjantie.*] *Eng. Feudal Law.* Any of a great variety of feudal services of a more or less personal or menial (household) nature, by which estates were held of the king or other lord; also, the tenure by which land was so held, or a piece of land held by such tenure. The tenure of sergeanty was distinct from the knight's, or military, tenure (though it might involve service in war) and from socage tenure. The nature of the service varied greatly with different holdings, common forms being service as the lord's steward, marshal, constable, chamberlain, usher, cook, forester, falconer, dog keeper, messenger, esquire or attendant in war, etc. Sergeanties were early divided into **grand** and **petty,** the distinction originally depending on pecuniary value, **grand sergeanty** giving the lord the rights of wardship and marriage. Later a **grand sergeanty** required personal performance and not a mere render. Finally in Littleton's time the **grand sergeanty** was limited to tenures of the king, **grand sergeanty** requiring some special personal service to the king (as the carrying of his banner, his sword at coronation, serving as his marshal, or the like), and **petty sergeanty** the rendering annually of some implement of war, as a bow, arrow, sword, flag, etc.

Servitude existed in America from 1619 to 1819. **b** A similar condition of enforced service which, in various phases, has existed in South America, South Africa, Java, etc.
4. State of slavish dependence; mental or moral bondage; social compulsion.
5. Condition of a servant or servitor; menial service.
6. Servants, collectively. *Obs.* *Milton.*
7. *Law.* A right in respect of an object, usually land, owned by one person in virtue of which the object is subject to a certain use or enjoyment by another person or for the benefit of another thing, as in the case of the common-law easement (which is a species of servitude). A servitude is **affirmative** when it permits an otherwise unpermitted act by the owner of it; **negative** when it imposes on the owner of the servient tenement forbearance of an otherwise permissible action. *Servitude* is esp. common in the Roman and Civil law, and is defined in the Pandects (§ 934) as "a right in virtue of which the thing of another renders service to a person or thing." In Roman law servitudes were classified as: **a Personal servitudes,** including usufruct, (mere) use (see USUFRUCT and USE), and habitation, or **habitatio,** right of residing in a house. **b** Prædial, or **real, servitudes,** or rights over land (called **prædium** or **res, serviens**) vested in a person by virtue of his ownership of other land (called **prædium,** or **res, dominans**), and including **rural,** or **rustic, servitudes,** affecting chiefly or only the soil; and **urban servitudes,** affecting chiefly or solely a building or buildings on land. The more important rural servitudes were: **iter,** or a right of way on foot or horseback; **actus,** a right of way for a carriage or cattle; **via,** a right of way in general; **pecoris ad aquam appulsus,** or right of way for watering cattle; **aquæhaustus,** or simply **haustus,** right of conducting water; **aquæductus,** right of drawing water; **jus pascendi,** right of pasture; and **calcis coquendæ,** or right of digging chalk. The chief urban servitudes were: **oneris ferendi,** right of support; **tigni immittendi,** right of inserting (the end of) a beam (in another's wall); **altius non tollendi,** right to have another not build higher (than a certain limit); **ne luminibus officiatur,** right to have the windows not shut off from light; **stillicidii recipiendi,** right of receiving the drip from a neighbor's roof; **aquæ immittendæ,** right to throw water from one's windows on a neighbor's buildings or soil; **oneris ferendi,** or right of support. The Civil law as to servitudes is essentially the same as the Roman law, but the Civil law includes under this head a rent charge.
Syn. — SERVITUDE, SLAVERY, BONDAGE. SERVITUDE may apply to either voluntary or (more frequently) compulsory subjection to a master; SLAVERY and BONDAGE (the stronger term) imply absolute and enforced subjugation to another's will. See SERF, MENIAL, PRISONER
